Storing Food Without Refrigeration-Carolyn Shearlock 2019-03 With a little planning and foresight, refrigeration is absolutely not necessary. In this book, the author discusses how to store food and make delicious meals without the use of a refrigerator. From milk and cheese to eggs and meat, the book lays out ways any boater, hiker, or camper can have home-cooked meals without artificially freezing or cooling their food. Broken down into handy categories, this reference guide gives techniques on how to properly wash, store, treat, and cook your food for maximum flavor and usability. Written by a dedicated sailor whose own skills were honed on months-long journeys, the tips in this guide can be put to use by anyone trying to avoid heavy, power-sucking refrigerators. Sailors, campers, and hikers all could benefit, and the books serves equally well for those in RVs, those with limited space, and those trying to live off the grid.

Tourism in South-East Asia-Michael Hitchcock 2018-11-15 South-East Asia has developed rapidly as a tourist destination, but what are the effects of this growth upon the peoples of the region? How far is it possible to control the impact of tourism whilst also supporting the industry's role in the region's development?

This book, first published in 1993, attempts to answer these questions by providing a critical analysis of the nature of tourism as it has developed in the area. It questions commonly held assumptions about tourism both from a western perspective and from the point of view of policy makers in the region. It explores central issues such as the impact of tourism on the environment, culture and the economy, placing it within an historical and political context in order to assess the implications of current developments. The contributors use case studies from a variety of countries on such aspects as the sex industry, dream holidays and rural handicrafts, assessing tourist perceptions, both domestic and international, and policy decisions. By taking a long-term perspective it should provoke thought on the ways to develop sustainable tourism for the future.

The Black Swan-Nassim Nicholas Taleb 2007-04-17 The Black Swan is a standalone book in Nassim Nicholas Taleb's landmark Incerto series, an investigation of opacity, luck, uncertainty, probability, human error, risk, and decision-making in a world we don't understand. The other books in the series are Fooled by Randomness, Antifragile, and The Bed of Procrustes. A black swan is a highly improbable event with three principal characteristics: It is unpredictable; it carries a massive impact; and, after the fact, we concoct an explanation that makes it appear less random, and more predictable, than it was. The astonishing success of Google was a black swan; so was 9/11. For Nassim Nicholas Taleb, black swans underlie almost everything about our world, from the rise of religions to events in our own personal lives. Why do we not acknowledge the phenomenon of black swans until after they occur? Part of the answer, according to Taleb, is that humans are hardwired to learn specifics when they should be focused on generalities. We concentrate on things we already know and time and time again fail to take into consideration what we don't know. We are, therefore, unable to truly estimate opportunities, too vulnerable to the impulse to simplify, narrate, and categorize, and not open enough to rewarding those who can imagine the "impossible." For years, Taleb has studied how we fool ourselves into thinking we know more than we actually do. We restrict our thinking to the irrelevant and inconsequential, while large events continue to surprise us and shape our world. In this revelatory book, Taleb explains everything we know about what we don't know, and this second edition features a new philosophical and empirical essay, "On Robustness and Fragility," which offers tools to navigate and exploit a Black Swan world. Elegant, startling, and universal in its applications, The Black Swan will change the way you look at the world. Taleb is a vastly entertaining writer, with wit, irreverence, and unusual stories to tell. He has a polymathic command of subjects ranging from cognitive science to business to probability theory. The Black Swan is a landmark book—itsself a black swan. Praise for Nassim Nicholas Taleb "The most prophetic voice of all."—GQ Praise for The Black Swan "[A book] that altered modern thinking."—The Times (London) "A masterpiece."—Chris Anderson, editor in chief of Wired, author of The Long Tail "Idiosyncratically brilliant."—Niall Ferguson, Los Angeles Times "The Black Swan changed my view of how the world works."—Daniel Kahneman, Nobel laureate "[Taleb writes] in a style that owes as much to Stephen Colbert as it does to Michel de Montaigne. . . . We eagerly romp with him through the follies of confirmation bias [and] narrative fallacy."—The Wall Street Journal "Hugely enjoyable—compelling . . . easy to dip into."—Financial Times "Engaging . . . The Black Swan has appealing cheek and admirable ambition."—The New York Times Book Review From the Hardcover edition.

Dismantling Glory-Lorrie Goldensohn 2006-04-18 Dismantling Glory presents the most personal and powerful words ever written about the horrors of battle, by the very soldiers who put their lives on the line. Focusing on American and English poetry from World War I, World War II, and the Vietnam War, Lorrie Goldensohn, a poet and pacifist, affirms that by and large, twentieth-century war poetry is fundamentally antiwar. She examines the changing nature of the war lyric and takes on the literary thinking of two countries separated by their common language. World War I poets such as Wilfred Owen emphasized the role of soldier as victim. By World War II, however, English and American poets, influenced by the leftist politics of W. H. Auden, tended to indict the whole of society, not just its leaders, for militarism. During the Vietnam War, soldier poets accepted themselves as both victims and perpetrators of war's misdeeds, writing a nontraditional, more personally candid war poetry. The book not only discusses the poetry of trench warfare but also shows how the lives of civilians—women and children in particular—entered a global war poetry dominated by air power, invasion, and occupation. Goldensohn argues that World War II blurred the boundaries between battleground and home front, thus bringing women and civilians into war discourse as never before. She discusses the interplay of fascination and disapproval in the texts of twentieth-century war and notes the way in which homage to war hero and victim contends with revulsion at war's horror and waste. In addition to placing the war lyric in literary and historical context, the book discusses in detail individual poets such as Wilfred Owen, W. H. Auden, Keith Douglas, Randall Jarrell, and a group of poets from the Vietnam War, including W. D. Ehrhart, Bruce Weigl, Yusef Komunyakaa, David Huddle, and Doug Anderson. Dismantling Glory is an original and compelling look at the way twentieth-century war poetry posited new relations between masculinity and war, changed and complicated the representation of war, and expanded the scope of antiwar thinking.
