Sound Souvenirs-Karin Bijsterveld 2009 In recent decades, the importance of sound for remembering the past and for creating a sense of belonging has been increasingly acknowledged. We keep "sound souvenirs" such as cassette tapes and long play albums in our attics because we want to be able to recreate the music and everyday sounds we once cherished. Artists and ordinary listeners deploy the newest digital audio technologies to recycle past sounds into present tunes. Sound and memory are inextricably intertwined, not just through the commercially exploited nostalgia on oldies radio stations, but through the exchange of valued songs by means of pristine recordings and cultural practices such as collecting, archiving and listing. This book explores several types of cultural practices involving the remembrance and restoration of past sounds. At the same time, it theorizes the cultural meaning of collecting, recycling, reciting, and remembering sound and music.

Mysteries of Borobudur Discover Indonesia-John Miksic 2013-02-22 With vivid photography and insightful commentary, this travel pictorial shines a light on the Buddhist art and architecture of Borobudur. The glorious ninth-century Buddhist stupa of Borobudur—the largest Buddhist monument in the world—stands in the midst of the lush Kedu Plain of Central Java in Indonesia, where it is visited annually by over a million people. Borobudur contains more than a thousand exquisitely carved relief panels extending along its many terraces for a total distance of more than a kilometer. These are arranged so as to take the visitor on a spiritual journey to enlightenment, and one ascends the monument past scenes depicting the world of desire, the life story of Buddha, and the heroic deeds of other enlightened beings—finally arriving at the great circular terraces at the top of the structure that symbolize the formless world of pure knowledge and perfection.

VOLVO PENTA MD2010, MD2020, MD2030, MD2040-Volvo Penta 2014-03-02

The Tiddler Invasion-Floyd Orr 2013-06-29 This is the book collectors, restorers, and nostalgic fans of the machines of our youth have been waiting to arrive! After years of extensive research through archives of motorcycle magazines, books, and brochures from the classic era, the founder of the seminal Tiddlerosis website has published his magnum opus on the subject. The Tiddler Invasion covers many miles of two-wheeled motorized nostalgia. Thousands of facts, figures, colors, specifications, and even original prices are packed into more than 600 detailed pages. The story of the invasion of the USA by small motorcycles and scooters in the 1955-1975 era is told with enthusiasm for these many wondrous little machines by someone who lived through that special time in our nation's history. The book includes approximately 180 charts of the popular models sold in the U.S. during the period and well over 400 B&W photos. The author and two major collectors of these special little bikes share nostalgic personal remembrances of a wondrous time past. The focus of The Tiddler Invasion is on the most common machines of the period, mostly from Japan. Honda, Yamaha, Kawasaki, and Suzuki each have a detailed chapter. Bridgestone, Hodaka, Tohatsu, and other early brands share a chapter. The story basically begins with the arrival of the Honda 50 in 1959 and ends with the release of the Gold Wing in 1975. The tiddler era rose to prominence in the Sixties and began its slow descent into obscurity as the Kawasaki Mach III, the Honda 750 Four, and the

Kawasaki Z-1 took over the U.S. motorcycle market. The major brands from the USA are detailed in a chapter, too. This group is of course dominated by Harley-Davidson, Allstate, and Cushman, just as it was back then. There are no H-D Big Twins here, but plenty of Hummers, Toppers, Super Eagles, Mopeds and Twingles! There were countless European brands and models imported in the Sixties, but only those of significance are included. As we all know, most of the European models were either large road burners, obscure small Italian bikes and scooters, or off-road competition machines. You will not find Nortons, Guzzis, Maicos or Parillas here, but the European chapter is quite sizable nonetheless. The most difficult element to communicate to a prospective reader is the definition of the machines and parameters included in this book. The concept of The Tiddler Invasion is unique to the time and place. Although the 50cc machines began Americans' rush to motorcycle dealerships, the market rapidly expanded from that point. The smallest machines covered in the book are the true tiddlers, but these little putt-putts for kids comprised only the tip of the iceberg. Many classic 250cc sports machines such as the Ducati Diana, Harley-Davidson Sprint H, Honda Hawk, Yamaha YDS-2, Suzuki X-6, and Bultaco Metralla roar through the pages of this book! The Kawasaki Triples scream through it so much you will choke on the two-stroke smoke! The author has a thing for the Honda Scramblers, as if they were dark-haired beauties in bikinis or something. The kings of upswept exhaust pipes and crossbrace handlebars get their own chapter. Once you have possession of this book, you will never want to give it up. The Tiddler Invasion is not a coffee table book of pretty color pictures. It is a reference guide crammed to the Snuff-or-Nots with useful info for collectors and enthusiasts of small classic motorcycles. The author began collecting motorcycle brochures and magazines in 1962. Reproductions of and detailed information from these sources are included in this extensive reference guide. The author of this book is not a collector, a photographer, or a restorer. He is a super-nerd who clearly loves these classic machines. The earliest part of this book was written in 1985 on a 1959 IBM typewriter. Now with the help of modern computers, the whole, wonderful, magical story of that very special era in American history can finally be told!
