Bolustokolyse in Theorie und Praxis-Ludwig Spätling 2013-03-07 Die Senkung der perinatalen Mortalität und Morbidität steht in direktem Zusammenhang mit der Behandlung vorzeitiger Wehentätigkeit. Hohe Dosen von Betamimetika sind zwar wehenhemmend, greifen aber intensiv in den Stoffwechsel ein. Wenn also Betamimetika angewendet werden müssen, sollte dies in der geringst möglichen Dosierung geschehen. Die Bolustokolyse leistet dies, indem das Betamimetikum nicht mehr kontinuierlich, sondern pulsatil appliziert wird. Eine Bestandsaufnahme dieses Verfahrens für Theorie und Praxis bietet das vorliegende Buch.

Bone Scanning in Clinical Practice-Ignac Fogelman 2012-12-06 The most frequently requested investigation in any nuclear medicine department remains the technetium-99m (99mTc)-labelled diphosphonate bone scan. Despite rapid advances in all imaging modalities. there has been no serious challenge to the role of bone scanning in the evaluation of the skeleton. The main reason for this is the exquisite sensitivity of the bone scan for lesion detection. combined with clear visualisation of the whole skeleton. In recent years several new diphosphonate agents have become available with claims for superior imaging of the skeleton. Essentially. they all have higher affinity for bone. thus allowing the normal skeleton to be visualised all the more clearly. However. as will be dis cussed. this may occur at some cost to the principal role of bone scanning. lesion detection. The major strength of nuclear medicine is its ability to provide functional and physiological information. With bone scanning this leads to high sensitivity for focal disease if there has been any disturbance of skeletal metabolism. However. in many other clinical situations. and particularly in metabolic bone disease. more generalised alteration in skeletal turnover may occur. and quantitation of diphosphonate uptake by the skeleton can provide valuable clinical information.

South Bend in Vintage Postcards-John Palmer 2005 In the early 20th century, South Bend, Indiana's population more than tripled. Established industries like Studebaker and the Singer Sewing company rose to unprecedented heights of production, new businesses took root, and immigrants flooded into the area. Photo postcards, originally a quick and inexpensive form of communication, became key documents of South Bend's growth, recording events, businesses, landmarks, and people. Through nearly 200 vintage postcards, this book details South Bend's story from the turn of the 20th century to the aftermath of World War II. These images give a glimpse of lost glamour, representing the city as past generations witnessed it.

Soil Fertility, Animal Health - With "The Loss of Soil Organic Matter and its Restoration"-William A. Albrecht 2015-02-15 Nature works and has been working for a billion and a half years-ever since there were living things on earth. This is important. We talk of controlling nature, but any wise farmer or stockman knows that nature makes the rules for us to learn and follow, if we can. In short, the ecologist is in a position to furnish us, in many ways, models which we can follow in our own operations. Before the prairies were settled, plowed and fenced, wild herds moved back and forth across them, never staying in one place after the grass was cropped too short. These moving herds distributed minerals from their droppings and remains, for it is well-known that wild animals usually maintain a good mineral balance by visiting salt-licks and varying their pasture-grounds. Here in a nutshell is the model for proper use of grasslands. It takes a lot of common sense to get across the information we need. He has it and can put it out so we can all understand it. (From the Introduction)

Clinical Topics in Child and Adolescent Psychiatry-Sarah Huline-Dickens 2014-03-03 However much policy material is produced, the real function of most child psychiatrists is to assess and treat mental disorders in childhood and adolescence. This is a comprehensive update on the field that will inform the clinical practice of all child and adolescent mental health professionals. The authors bring the medical perspective to bear on psychopathology and demonstrate that our understanding of childhood psychiatric disorders, their origins and their treatments are improving. They write with a particular focus on four contemporary themes - continuity into adult life, the integration of biological and social aetiology, the influence of neuroscience, and the increasing use of research and evidence - and take into account recent changes in DSM-5. Some chapters have been specially commissioned for this book, while previous versions of the others have been published in the journal Advances in Psychiatric Treatment and have now been fully revised and updated in line with the four themes. The new chapters include disorders in 0- to 4-year-olds, Tourette syndrome and the clinically significant topic of anxiety. Other topics include: autism spectrum disorders, behavioural and affective disorders, pharmacology and psychological therapies, fabrication and induction of illness, and gender dysphoria. All the topics covered are central to the work of practising child and adolescent mental health professionals, and many will also be relevant to paediatricians, psychologists, social workers, and trainees in all these fields.

Fair Cop-Christine Nixon 2012-08-01 Christine Nixon became the first female Chief Commissioner of Police in Australia, appointed to head Victoria Police, at a most crucial time-the underworld was in the midst of a bloody war, the spectre of terrorism was emerging as a powerful new threat, and there was a stench of internal corruption. In this frank and engaging memoir, Christine Nixon reflects on the journey of a woman deep into a man's world, describing the experiences that shaped her commitment to a model of policing as a community service, committed to caring for society's most vulnerable. She explores the challenges of managing a police force through a period of profound social and cultural change, explains the hidden tensions at the front line of politics and policing and exposes the poisonous culture war within police ranks. Fair Cop candidly shares the public and private stories of Christine Nixon-woman, spouse, citizen, constable-on a journey that encounters tragedy, corruption, ambition and humility. In its final chapters, it takes readers inside the events of Black Saturday, the disaster that would so cruelly scar the state of Victoria, claim so many lives, and test Christine Nixon as nothing before. It tracks the intimate story of her days before the Bushfires Royal Commission and recounts her efforts, as head of the Victorian Bushfires Reconstruction and Recovery Authority, to renew ravaged communities.

De-Westernizing Film Studies-Saer Maty Ba 2012-09-10 De-Westernizing Film Studies aims to consider what form a challenge to the enduring vision of film as a medium - and film studies as a discipline - modelled on 'Western' ideologies, theoretical and historical frameworks, critical perspectives as well as institutional and artistic practices, might take today. The book combines a range of scholarly writing with critical reflection from filmmakers, artists & industry professionals, comprising experience and knowledge from a wide range of geographical areas, film cultures and (trans-)national perspectives. In their own ways, the contributors to this volume problematize a binary mode of thinking that continues to promote an idea of 'the West and the rest' in relation to questions of production, distribution, reception and representation within an artistic medium (cinema) that, as part of contemporary moving image culture, is more globalized and diversified than at any time in its history. In so doing, De-Westernizing Film Studies complicates and/or re-thinks how local, national and regional film cultures 'connect' globally, seeking polycentric, multi-directional, non-essentialized alternatives to Eurocentric theoretical and historical perspectives found in film as both an artistic medium and an academic field of study. The book combines a series of chapters considering a range of responses to the idea of 'de-westernizing' film studies with a series of in-depth interviews with filmmakers, scholars and critics. Contributors: Nathan Abrams, John Akomfrah, Saër Maty Bâ, Mohammed Bakrim, Olivier Barlet, Yifen Beus, Farida Benlyazid, Kuljit Bhamra, William Brown, Campbell, Jonnie Clementi-Smith, Shahab Esfandiary, Coco Fusco, Patti Gaal-Holmes, Edward George, Will Higbee, Katharina Lindner, Daniel Lindvall, Teddy E. Literacy Myths, Legacies, and Lessons-Harvey J. Graff 2017-07-05 In his latest writings on the history of literacy and its importance for present understanding and future rethinking, historian Harvey J. Graff continues his critical revisions of many commonly held ideas about literacy. The book speaks to central concerns about the place of literacy in modern and late-modern culture and society, and its complicated historical foundations. Drawing on other aspects of his research, Graff places the chapters that follow in the context of current thinking and major concerns about literacy, and the development of both historical and interdisciplinary studies. Special emphasis falls upon the usefulness of "the literacy myth" as an important subject for interdisciplinary study and understanding. Critical stock-taking of the field includes reflections on Graff's own research and writings of the last three decades, and the relationships that connect interdisciplinary rethinking and the literacy myth. The collection is noteworthy for its attention to Graff's reflections on his identification of "the literacy myth" and in developing LiteracyStudies@OSU (Ohio State University) as a model for university-wide interdisciplinary programs. It also deals with ordinary concerns about literacy, or illiteracy, that are shared by academics and concerned citizens. These nontechnical essays will speak to both academic and nonacademic audiences across disciplines and cultural orientations.

Renegades Write the Rules-Amy Jo Martin 2012-08-29 Learn the rules to building loyal (and lucrative) digital followings Renegades Write the Rules reveals the innovative strategies behind the social media success of today's top celebrities, brands, and sports icons, and how you can follow their lead. Author Amy Jo Martin is the founder of Digital Royalty and the woman who pioneered how professional sports integrate social media. In this book she shows how to build a faithful following and beat the competition clamoring for people's attention by continually delivering value - when, where, and how people want it. People want to be heard, to be involved, to be entertained, to be adventurous, to be informed. Reveals the winning strategies for using social media to achieve dramatic results Shows how to gain influence with social media that requires an unprecedented (and potentially uncomfortable) level of accessibility and ongoing affinity Filled with illustrative examples of social media successes (including Dwayne 'The Rock' Johnson, Shaquille O'Neal, and Nike) that show how humanizing a brand through social media leads to monetization Explores how Amy Jo Martin and other successful entrepreneurs are becoming renegades by using social media to innovate their personal and professional lives The book reveals one of the basic rules of digital media success: Humans connect with humans, not logos and creative taglines.

The Roman Law of Obligations-Peter Birks 2014 This volume contains Birks' notes on a series of lectures on the Roman law of obligations delivered in 1982. They give a comprehensive insight into his views on the topic, which are relevant in both a Roman context and also from a modern English perspective. The book examines, in turn, the law of contracts with its general principles and rule applications to the transactions mentioned in the Institutes; the law of delicts; and finally the miscellany of residual obligations from which the later categories of quasi-contracts and quasi-delicts, but also the modern law of unjust enrichment, emerged.
