Surveyor- 1964-10

Monterey in 1786-Jean-François de Galaup comte de La Pérouse 1989 On the afternoon of September 14, 1786, two French ships appeared off the coast of Monterey, the first foreign vessels to visit Spain's California colonies. Aboard was a party of eminent scientists, navigators, cartographers, illustrators, and physicians. For the next ten days the commander of this expedition, Jean François de La Pérouse, took detailed notes on the life and character of the area: its abundant wildlife, the labors of soldiers and monks, and the customs of Indians recently drawn into the mission. These observations provide a startling portrait of California two centuries ago.

The Tractor in the Haystack-Scott Garvey For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.

Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles-National Research Council 2015-09-28 The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials

significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.

The Soil Underfoot-G. Jock Churchman 2014-04-21 The largest part of the world's food comes from its soils, either directly from plants, or via animals fed on pastures and crops. Thus, it is necessary to maintain, and if possible, improve the quality—and hence good health—of soils, while enabling them to support the growing world population. The Soil Underfoot: Infinite Possibilities for a Finite Resource arms readers with historical wisdom from various populations around the globe, along with current ideas and approaches for the wise management of soils. It covers the value of soils and their myriad uses viewed within human and s

contexts in the past, present, and supposed futures. In addition to addressing the technical means of maintaining soils, this book presents a culturally and geographically diverse collection of historical attitudes to soils, including philosophical and ethical frameworks, which have either sustained them or led to their degradation. Section I describes major challenges associated with climate change, feeding the increasing world population, chemical pollution and soil degradation, and technology. Section II discusses various ways in which soils are, or have been, valued—including in film and contemporary art as well as in religious and spiritual philosophies, such as Abrahamic religions, Maori traditions, and in Confucianism. Section III provides stories about soil in ancient and historic cultures including the Roman Empire, Greece, India, Japan, Korea, South America, New Zealand, the United States, and France. Section IV describes soil modification technologies, such as polymer membrane barriers, and soil uses outside commercial agriculture including the importance of soils for recreation and sports grounds. The final section addresses future strategies for more effective sustainable use of soils, emphasizing the biological nature of soils and enhancing the use of "green water" retained from rainfall.

The Great Second Advent Movement—John Norton Loughborough 1909

There are already many useful books in the hands of the people, and my apology for adding another to the list, is that in these pages I state many things concerning Adventist, and especially Seventh-day Adventist, which have not heretofore been brought in this form before the people. Besides this, many who espoused the cause in later years, and who have not witnessed the things mentioned, have earnestly requested a narration of these facts and experiences from those earlier in the work. Having been familiar with the advent movement in 1843 and 1844, and having, since Jan. 2, 1849 proclaimed the doctrine, first as an Adventist, I esteem it a pleasure to "speak the things I have seen and heard."

Nobody's Perfect-Annabel M. Patterson 2002 Is history driven more by principle or interest? Are ideas of historical progress obsolete? Is it unforgivable to change one's mind or political allegiance? liberal thought from its roots in seventeenth-century English thinking to the end of the eighteenth century, Annabel Patterson tackles these important historiographical questions. She rescues the term "whig" from the low regard attached to it; denies the primacy of self-interest in the political struggles of Georgian England; and argues that while Whigs may have strayed from liberal principles on occasion (nobody's perfect), nevertheless many were true progressives. In a series of case studies, mainly from the reign of George III, Patterson examines or re-examines the careers of such prominent individuals as John Almon, Edmund Burke, Sir Joshua Reynolds, Thomas Erskine, and, at the end of the century, William Wordsworth. She also addresses a host of secondary characters, reshaping our thinking about both well-known and lesser figures of the time. Tracking a coherent, sustained, and adaptable liberalism throughout the eighteenth century, Patterson overturns common assumptions of political, cultural, and art historians. The author delivers fresh insights into the careers of those who called themselves Whigs, their place in British political thought, and the crucial ramifications of this thinking in the American political arena. The Three Laws of Performance-Steve Zaffron 2019-03-06 In our work lives when something isnt working, we struggle with what part of the problem to tackle first.Â Do we start with cost reduction?Â What about morale?Â Or should we go for process improvements first? We pick the problem to work on, and depending on whether our plan makes sense, one of two things happens.Â Â First, we failand then we add frustration to our list of problems. Two, we succeed, and then some new problem pops out to replace the old.Â We cut 10% out of our budget, and our star performers leave in frustration because we sliced what they saw as a critical program.Â Its as though the system were working on is an old inner tube.Â The moment we patch one hole and add pressure, another spot tears open. The point is that its possible to change everythingÂ at once. Seem far fetched?Â Zaffron and Logan make a compelling argument that executives spend their time and money adjusting the systems in which people operate rather than targeting people's performance directly.Â When the three laws in this book are applied

performance transforms to a level far beyond what most people think is possible. These laws are: 1. How people perform correlates to how situations occur to them. 2. How a situation occurs arises from language. 3. Future-based language transforms how situations occur to people. Steve Zaffron has helped hundreds of companies envision and effectively implement major change and performance improvement. He presents a proven system for rallying all of an organization's employees around a new vision, and more importantly, making it stick. The focus is on making such transformations permanent and repeatable, providing practical examples from clients such as Apple, Lockheed Martin, Johnson & Johnson, Morgan Stanley, and many others.

A Pair of Shootists- Jerry Kuntz 2010 In 1888, Samuel F. Cody, a twenty-one-year-old horse wrangler, met Maud Lee, a sixteen-year-old aspiring circus performer, while touring with the Wild West show cast of Adam Forepaugh's Circus. A quick rapport developed between the girl from Norristown, Pennsylvania, and the cowboy who dazzled audiences with his good looks and fancy pistol shooting. A Pair of Shootists is the exuberant and sometimes

heartbreaking story of the elusive S. F. Cody and his first wife, Maud Lee. Recounting their many dramatic exploits, this biography also overturns the frequently romanticized view of Wild West shows. Living the erratic lives of touring performers, S. F. Cody — who changed his name to capitalize on his resemblance to William F. "Buffalo Bill" Cody — and Maud Lee first appeared together in vaudeville halls and dime museums. Setbacks in the United States made Cody and Lee eager to try their luck abroad, so they traveled to Great Britain, where they played music halls and acted in burlesques on roller-skates and in extravagant arena exhibitions. When the two performers eventually parted ways, author Jerry Kuntz masterfully splits their stories into two. From there, he follows their individual ups and downs, including Cody's soaring career in pioneer aeronautics and Lee's decline into mental illness and addiction. In an ironic twist, Maud's professional life ended amidst a vast misunderstanding that brought her into conflict with the woman she had been emulating her entire career: Annie Oakley. While other biographies focus mainly on Cody's contribution to aviation, Kuntz uses sources previously unavailable to scholars to paint a more complete picture of Cody's early years and to recover the forgotten — and ultimately tragic — story of Maud Lee.
