Parent Management Training-Alan E. Kazdin 2008-12-01 Among evidence-based therapies for children and adolescents with oppositional, aggressive, and antisocial behavior, parent management training (PMT) is without peer; no other treatment for children has been as thoroughly investigated and as widely applied. Here, Alan E. Kazdin brings together the conceptual and empirical bases underlying PMT with discussions of background, principles, and concepts, supplemented with concrete examples of the ways therapists should interact with parents and children. The second half of the book is a PMT treatment manual. The manual details the particulars of the therapy: what is done to and by whom, what the therapist should say, and what to expect at each stage of treatment. It also contains handouts, charts, and aides for parents. A companion website (www.oup.com/us/pmt) provides additional resources for clinicians.

Parenting-Loredana Benedetto 2018-02-06 Through parenting, adults raise their children and introduce them into the belonging community. Parents are active determinants of their children's well-being, but children themselves are too. The volume focuses on some relevant theoretical issues related to children's and adolescent adjustments, adult maternal and paternal behaviors, and their self-efficacy beliefs and competence interacting with children's characteristics. The volume also presents evidence-based treatments involving parents as key components of the intervention strategies for childhood internalizing/externalizing disorders. Parent behaviors produce changes and consequences in the child's emotive-behavioral adjustment; thus, a modification of the parenting style may be an effective way to help children and to ameliorate the family climate. Practitioners interested in parenting will find in the updated studies here reviewed new suggestions for preventive family interventions.

Attachment Disturbances in Adults: Treatment for Comprehensive Repair-Daniel P. Brown 2016-09-13 A comprehensive treatment approach for the repair and resolution of attachment disturbances in adults, for use in clinical settings. With contributions by Paula Morgan-Johnson, Paula Sacks, Caroline R. Baltzer, James Hickey, Andrea Cole, Jan Bloom, and Deirdre Fay. Attachment Disturbances in Adults is a landmark resource for (1) understanding attachment, its development, and the most clinically relevant findings from attachment research, and (2) using this understanding to inform systematic, comprehensive, and clinically effective and efficient treatment of attachment disturbances in adults. It offers an innovative therapeutic model and set of methods for treating adult patients with dismissing, anxious-preoccupied, or disorganized attachment. In rich detail, it integrates historical and leading-edge attachment research into practical, effective treatment protocols for each type of insecure attachment. Case transcripts and many sample therapist phrasings illustrate how to apply the methods in practice. Part I, "Foundational Concepts," features a comprehensive overview of the field of attachment, including its history, seminal ideas, and existing knowledge about the development of attachment bonds and behaviors. Part II, "Assessment," addresses the assessment of attachment disturbances. It includes an overview of attachment assessment for the clinician and a trove of practical recommendations for assessing patients' attachment behavior and status both outside of and within the therapeutic relationship. In Part III, "Treatment," the authors not only review existing treatment approaches for attachment disorders in adults, but also introduce an unprecedented, powerful new treatment method. This method, the "Three Pillars" model, is built on three essential clinical ingredients: Systematically utilizing ideal parent figure imagery to develop a new positive, stable internal working model of secure attachment Fostering a range of metacognitive skills Fostering nonverbal and verbal collaborative behavior in treatment Used together, these interdependent pillars form a unified and profoundly effective method of treatment for attachment disturbances in adults—a must for any clinician. In Part IV, "Type-Specific Treatment," readers will learn specific variations of the three treatment pillars to maximize efficacy with each type of insecure attachment. Finally, Part V, "A Treatment Guide and Expected Outcomes," describes treatment in a step-by-step format and provides a success-assessment guide for the Three Pillars approach. This book is a comprehensive educational resource and a deeply practical clinical guide. It offers clinicians a complete set of tools for effective and efficient treatment of adult patients with attachment disturbances.

The Comprehensive Resource Model-Lisa Schwarz 2016-10-04 Traditional methods employed in psychotherapy have limited effectiveness when it comes to healing the psychological effects of trauma, in particular, complex trauma. While a client may seem to make significant breakthroughs in understanding their feelings and experiences on a rational level by talking with a therapist, this will make no difference to their post-traumatic symptoms if the midbrain is unable to modulate its activity in response. The Comprehensive Resource Model argues for a novel therapeutic approach, which uniquely bridges neuroscience and spirituality through a combination of somatic therapy, traditional psychotherapy, and indigenous healing concepts to provide effective relief to survivors of trauma. The Comprehensive Resource Model was developed in response to the need for a streamlined, integrative therapeutic model; one which engages a scaffolding of neurobiological resources in many brain structures simultaneously in order for clients to be fully embodied and conscious in the present moment while processing their traumatic material. All three phases of trauma therapy: resourcing, processing, and integration are done simultaneously. Demonstrating a nested model and employing brain and body-based physiological safety as the foundation of healing, chapters describe three primary categories of targeted processing: implicit and explicit survival terror, 'Little T Truths', and 'Big T Truths', all of which contribute to thorough healing of complex trauma and an expansion into higher states of consciousness and embodiment of the essential core self. This book describes the development and benefits of this pioneering new approach to trauma therapy. As such, it will be of key interest to academics, researchers and postgraduate students in the fields of psychiatry, psychotherapy, psychology and trauma studies. It will also appeal to practising therapists, psychiatrists, psychologists, psychiatric nurses, and to others involved in the treatment or management of patients with complex trauma disorders.

Working with Parents of Noncompliant Children-Mark D. Shriver 2008 This book presents an in-depth look at evidence-based programs for training parents of children with behavior problems. Authors Shriver and Allen review the empirical support for four major programs, as well as some more popular programs that lack strong empirical support. Throughout this review they teach readers how to identify the best research in parent training, how to prepare for parent training sessions, and finally show how to translate this research into everyday practice.Parents usually are the most influential people in a child's life. So when child problems like noncompliance, hyperactivity, sleep problems, feeding problems, toileting problems, academic problems, and adolescent - parent conflict arise it is important for parents to take on the primary role in their resolution. This book explains what parents are taught when collaborating with a psychologist or counselor and how they are taught effectively.Practitioners, whether they are experienced, new to parent training, or students of the field, will find this book to be a valuable resource for taking interventions developed under tightly controlled research conditions and adapting them to the conditions of day-to-day practice, where resources are more limited and presenting problems are often more complex.

The Glass Castle-Jeanette Walls 2006-01-02 Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

Intellectual Disability-James C. Harris, M.D. 2010-06-24 Approximately 2.5 million people in the United States—one percent of the population—have an intellectual disability (previously referred to as mental retardation). These conditions range from genetic disorders such as Down syndrome to disabilities caused by infectious diseases and brain injury. Intellectual Disability: A Guide for Families and Professionals, by one of the country's foremost authorities on intellectual disability, is a comprehensive resource that will be of importance to anyone with a personal connection to a child or adult with a neurodevelopmental disorder. Emphasizing the humanity of persons with intellectual and related developmental disabilities, psychiatrist and pediatrician James Harris provides essential information on assessment and diagnosis of intellectual disability, treatments for specific disorders, and ways to take advantage of the wide array of services available today. The focus throughout is on the development of the person, the positive supports necessary for self-determination, and, to the extent possible, independent decision making. Harris also surveys historical attitudes toward intellectual disability, the medical community's current understanding of its causes and frequency, and the associated physical, behavioral, and psychiatric conditions (such as seizure disorder, depression, and autism) that often accompany particular types of intellectual disability. The book addresses legal, medical, mental health, and research-related issues as well as matters of spirituality, highlighting the ways in which individuals with intellectual disability can meaningfully participate in the spiritual lives of their families and their communities. Each chapter ends with a series of key points to remember, and the book concludes with a list of additional resources of further interest. Intellectual Disability is a must-read for parents and families of those with neurodevelopmental disorders, providing guidance and essential information to help their family members effectively, and to make a significant, positive difference in their lives now and in the future.

Pediatric Psychogenic Non-Epileptic Seizures-Rochelle Caplan 2017-06-08 This volume describes the basics for short- and long-term treatment of Psychogenic Non-Epileptic Seizures (PNES) in children. The text acknowledges that the disorder, though rare and highly morbid, is treatable when it is not misdiagnosed. Given the limited diagnostic and clinical training offered to clinicians, this book aims to equip professionals with the tools needed to improve the poor quality of life of youth with PNES. The text begins by introducing the main features of the disorder and the problems involved in diagnosing PNES in children. It then describes techniques to overcome these problems in order to make a reliable and valid diagnosis of PNES, as well as provide feedback on the diagnosis and treatment plan. The last section describes the indications for cognitive behavior therapy for youth with PNES and suggested treatment paradigms. Incorporation of do's and don'ts and their relevant clinical examples in all sections of the proposed guide provide the reader with skills and techniques. The book also includes an appendix with resources for parents, children, and school nurses and teachers, relaxation techniques for the child and parents, templates of letters for the child's school about the condition and behavior management plan, templates of supporting letters from epileptologists and primary care physicians, CBT treatment paradigm, and information on individual supervision, workshops and webinars. Written by the few experts in this area, Pediatric Psychogenic Non-Epileptic Seizures is the ultimate guide for psychiatrists, psychologists, nurses, primary care physicians, neurologists, epileptologists, social workers, nurses, school counselors, and all medical professionals working with children experiencing seizures.

Cattle Bring Us to Our Enemies-J. Terrence McCabe 2010-02-11 An in-depth look at the ecology, history, and politics of land use among the Turkana pastoral people in Northern Kenya Based on sixteen years of fieldwork among the pastoral Turkana people, McCabe examines how individuals use the land and make decisions about mobility, livestock, and the use of natural resources in an environment characterized by aridity, unpredictability, insecurity, and violence. The Turkana are one of the world's most mobile peoples, but understanding why and how they move is a complex task influenced by politics, violence, historical relations among ethnic groups, and the government, as well as by the arid land they call home. As one of the original members of the South Turkana Ecosystem Project, McCabe draws on a wealth of ecological data in his analysis. His long-standing relationship with four Turkana families personalize his insights and conclusions, inviting readers into the lives of these individuals, their families, and the way they cope with their environment and political events in daily life. J. Terrence McCabe is Associate Professor of Anthropology, University of Colorado at Boulder.

Ramón María Del Valle-Inclán-Carol Maier 1994 "This book is a collection of eleven essays devoted to the work of Ramon del Valle-Inclan (1866-1936). Long the recipient of critical analyses from various perspectives, Valle-Inclan's writing has nevertheless been virtually neglected in the gender-based criticism that has given rise to important studies of his contemporaries in other European literatures. This means that his diverse female characters have not been fully examined, that many scholars continue to consider him an unqualified misogynist, and that a marked effort to surmount gender constraints, present throughout his work, has not been acknowledged, much less explicated. This lack of study is intimately related to a much broader lacuna in Hispanic literature and scholarship, for the working of gender norms and their interaction with economic, religious, and political institutions inscribed in the literature of turn-of-the-century Spain have only recently begun to receive detailed study." "The essays in this volume identify, explore, and interrogate issues of gender with respect to Valle-Inclan's writing. The results offer an altered portrait of Valle-Inclan in which attitudes attributed to him are questioned and reevaluated. In particular, studies of several strong female characters indicate that he envisioned a far more complex role for women than has formerly been recognized." "Three previously published essays were chosen to provide a grounding in work on gender and Valle-Inclan. The remaining essays were written for this volume. As an orientation for the reader and in order to assure that the collection will be of use and interest to non-Hispanists as well as specialized readers, an introduction to the collection defines the intentions of the editors, discusses the essays with respect to current criticism, and places Valle-Inclan and his writing in turn-of-the-century Spanish history and aesthetics. As a whole, the collection reads as far more than the sum of its individual essays, prompting a fuller appreciation of both Valle-Inclan and the social and cultural system to which he belongs."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Coping Power-John E. Lochman 2008-03-17 The Coping Power Program is designed for use with preadolescent and early adolescent aggressive children and their parents and is often delivered near the time of children's transition to middle school. Aggression is one of the most stable problem behaviors in childhood. If not dealt with effectively, it can lead to negative outcomes in adolescence such as drug and alcohol use, truancy and dropout, delinquency, and violence. This program has proven effective in helping to avoid these types of problems. The parent component of the program consists of 16 group meetings also held during the 5th and 6th grade school years. Parents are taught ways of reinforcing their children's positive behaviors, as well as effective discipline techniques for eliminating negative behaviors. Skills for improving family communication, providing academic support in the home, and building family cohesion are also a focus. Parents also learn how to give effective instructions and establish age-appropriate rules and expectations for their children at home. In addition to these basic parenting skills, the program describes relaxation techniques that parents can use to deal with their own stress. Tips for taking care of personal needs and effective time management strategies also help to ease the challenges of parenting an aggressive child.

The new edition also includes a history of healing practices, medicine, and psychotherapy, an examination of therapist effects, and a thorough review of the research on common factors such as the alliance, expectations, and empathy.

T. S. Eliot, Anti-Semitism, and Literary Form-Anthony Julius 1995 Julius's critically acclaimed study (looking both at the detail of Eliot's deployment of anti-Semitic discourse and at the role it played in his greater literary undertaking) has provoked a reassessment of Eliot's work among poets, scholars, critics and readers, which will invigorate debate for some time to come.

Fatherhood-H. Elizabeth Peters 2014-03-18 How much power does a father have to influence his children's development? A lively and often heated public debate on the role and value of the father in a family has been underway in the United States for the past decade. Nevertheless, we are far from understanding the complex ways in which fathers make contributions to their families and children. Fatherhood: Research, Interventions, and Policies addresses the central questions of the role of fathers: Ž What is the impact of father involvement on child outcomes? Ž What factors predict increased involvement of fathers? Bringing together papers presented at the Conference on Father Involvement, this volume includes contributions by leading scholars in anthropology, demography, economics, family science, psychology, and sociology. Many of the contributors also address the implications of father involvement for family policy issues, including family leave, child care, and child support. Furthermore, the discussion of fatherhood ranges well beyond the case of intact, middle-class, white families to include fathers from various ethnic groups and socioeconomic classes and of varied marital status, including fathers of nonmarital children, single-father families, and nonresident fathers. Fatherhood: Research, Interventions, and Policies addresses both practical and theoretical concerns, including: the redefinition of fatherhood changes over time in research on fatherhood the predictive power of fathers'activities on their children's adult outcomes the correlation between fathers'income and their involvement with their nonmarital children the influence of fathers on their sons'probability of growing up to become responsible fathers the effects of divorce on father-son and father-daughter relationships interventions that help to keep divorced fathers in touch with their children This comprehensive, powerful book combines pioneering empirical research with thoughtful consideration of the social and psychological implications of fatherhood. It is essential reading for researchers, policymakers, psychologists, and students of family studies, human development, gender studies, social policy, sociology, and human ecology.

The Karaites of Galicia-Mikhail Kizilov 2009 The book focuses on the history, ethnography, and convoluted ethnic identity of the Karaites, an ethnoreligious group in Eastern Galicia (modern Ukraine). The small community of the Karaites, a non-Talmudic Turkic-speaking minority, who had been living in Eastern Europe since the late Middle Ages, developed a unique ethnographic culture and religious tradition. The book offers the first comprehensive study of the Galician Karaite community from its earliest days until today with the main emphasis placed on the period from 1772 until 1945. Especially important is the analysis of the twentieth-century dejudaization (or Turkicization) of the community, which saved the Karaites from the horrors of the Holocaust.

Competing on Analytics-Thomas H. Davenport 2007-03-06 You have more information at hand about your business environment than ever before. But are you using it to "out-think" your rivals? If not, you may be missing out on a potent competitive tool. In Competing on Analytics: The New Science of Winning, Thomas H. Davenport and Jeanne G. Harris argue that the frontier for using data to make decisions has shifted dramatically. Certain high-performing enterprises are now building their competitive strategies around data-driven insights that in turn generate impressive business results. Their secret weapon? Analytics: sophisticated quantitative and statistical analysis and predictive modeling. Exemplars of analytics are using new tools to identify their most profitable customers and offer them the right price, to accelerate product innovation, to optimize supply chains, and to identify the true drivers of financial performance. A wealth of examples--from organizations as diverse as Amazon, Barclay's, Capital One, Harrah's, Procter & Gamble, Wachovia, and the Boston Red Sox--illuminate how to leverage the power of analytics.

Behavioral Intervention Research-Laura Gitlin, PhD 2015-12-07 " I applaud [this] book for providing a much needed overview of the entire "behavioral intervention pipeline." It fills a unique niche in its coverage of key theoretical and methodological aspects as well as its case examples and professional development considerations, which makes the content accessible and practical for a broad audience." -Marcia Ory, PhD From the Foreword This unique text provides comprehensive coverage of one of the most neglected--yet vitally important--areas of public health research: developing, evaluating, and implementing novel behavioral interventions in service and practice settings. Written for Masters- and Doctoral-level courses as well as novice and expert researchers in this area, the book examines the most critical issues surrounding this form of research in order to maximize the ability of intervention researchers to successfully implement current and future evidence-based protocols in practice settings. Expert contributors embrace key challenges --the complexities of health care delivery, disease management and prevention, rising costs, and changing population demographics--in shaping the push toward advancing more efficient and effective behavioral interventions and methodologies. Tackling numerous topics that have been neglected in traditional randomized trial handbooks, methodology texts, and books on dissemination and implementation science, the book addresses: ways to develop and advance an intervention, emerging hybrid trial designs - theories and new models for integrating behavioral interventions with implementation science - - recruitment and retention strategies for inclusion of diverse samples - research designs for different stages of intervention development - treatment fidelity models and measures - novel measurement and analytic strategies - cost analyses - selection of control groups - use of mixed methodology - ethics and informed consent - technology-based intervention approaches -
