English Electric Class 50 Diesel Locomotive manual-Jarrold Cotter 2017-05-11 The Class 50 locomotives were built by English Electric between 1967 and 1968. Fifty examples were built, and were initially used to haul express passenger trains on the, then non-electrified, section of the West Coast Main Line between Crewe and Scotland. They were originally hired from English Electric Leasing, and were eventually purchased outright by BR around 1973. Class 50s were nicknamed "Hoovers" by rail enthusiasts because of the distinctive sound made by the air-filters originally fitted (these proved unreliable, and were removed during mid-life refurbishment, but the "Hoover" nickname stuck). Once the electrification of the line from Crewe to Glasgow was completed, the locomotives were moved to services in the south west of England, primarily on the mainline from London to Exeter, and were eventually retired from service in 1994 after being progressively replaced by the InterCity 125 High-Speed Trains (HSTs).

Braxton Bragg-Earl J. Hess 2016-09-02 As a leading Confederate general, Braxton Bragg (1817-1876) earned a reputation for incompetence, for wantonly shooting his own soldiers, and for losing battles. This public image established him not only as a scapegoat for the South's military failures but also as the chief whipping boy of the Confederacy. The strongly negative opinions of Bragg's contemporaries have continued to color assessments of the general's military career and character by generations of historians. Rather than take these assessments at face value, Earl J. Hess's biography offers a much more balanced account of Bragg, the man and the officer. While Hess analyzes Bragg's many campaigns and battles, he also emphasizes how his contemporaries viewed his successes and failures and how these reactions affected Bragg both personally and professionally. The testimony and opinions of other members of the Confederate army--including Bragg's superiors, his fellow generals, and his subordinates--reveal how the general became a symbol for the larger military failures that undid the Confederacy. By connecting the general's personal life to his military career, Hess positions Bragg as a figure saddled with unwarranted infamy and humanizes him as a flawed yet misunderstood figure in Civil War history.

Vehicle Identification Number Requirements (Us National Highway Traffic Safety Administration Regulation) (Nhtsa) (2018 Edition)-The Law Library 2018-12-05 The Law Library presents the complete text of the Vehicle Identification Number Requirements (US National Highway Traffic Safety Administration Regulation) (NHTSA) (2018 Edition). Updated as of May 29, 2018 Based on concerns that the supply of unique available Vehicle Identification Numbers is diminishing, NHTSA is proposing to amend the agency's Vehicle Identification Number (VIN) regulation. The amendment would ensure that there will be a sufficient number of unique manufacturer identifiers and VINs for the current 17-character VIN system to use for at least another 30 years. This NPRM also proposes other changes to the VIN requirements, such as proposing to require that certain vehicle characteristics of low speed vehicles (LSVs) must be reflected in the VIN of LSVs. This rulemaking also responds to a petition for rulemaking from SAE International (SAE). This ebook contains: - The complete text of the Vehicle Identification Number Requirements (US National Highway Traffic Safety Administration Regulation) (NHTSA) (2018 Edition) - A dynamic table of content linking to each section - A table of contents in introduction presenting a general overview of the structure

She knows it is only a matter of time before someone slips and touches her, ending the single greatest shred of hope she ever had to find a cure.
