Process Control-B. Wayne Bequette 2003 Process Control: Modeling, Design, and Simulation is the first complete introduction to process control that fully integrates software tools-helping you master critical techniques hands-on, using MATLAB-based computer simulations. Author B. Wayne Bequette includes process control diagrams, dynamic modeling, feedback control, frequency response analysis techniques, control loop tuning, and start-to-finish chemical process control case studies.
Computer Design- 1981
CME- 1986
Today's Video-Peter Utz 2006 In a society that is increasingly steeped in video culture, the role of videographer is more and more prominent. Here is a do-it-yourself guide to videography that offers comprehensive information for anyone working in or hoping to enter this fast-growing field. Written by an educator, this revised and updated manual provides detailed information on shooting and editing videos. It begins with basic concepts and progresses through all facets of video equipment and technique. Discussions deal not only with the mechanics of shooting a video but also with the artistry involved. Special emphasis is placed on pre-production planning and the necessity of considering subject as well as audience. Helpful hints on production, staging and budgeting are also included. Mini-glossaries within the sections define important terms. The final section is devoted to in-depth strategies for shooting specific types of videos, including newscasts; legal, corporate and music videos; and weddings and other events.
