The Preeminent Nursing Terminology Classification System "The Clinical Care Classification (CCC) System described in this manual is the only standard coded nursing terminology that is based on sound research using the nursing process model framework and that meets the Patient Medical Record Information (PMRI) comparability requirement. The CCC System allows patient care data generated by nurses to be incorporated into the PMRI database, and enables nurses' contributions to patient outcomes to be studied and acknowledged." -- From the Foreword by Sheryl L. Taylor, BSN, RN, Senior Consultant, Farrell Associates TESTIMONIES: "ABC Coding Solutions-Alternative Link developed ABC codes for nursing in collaboration with Dr. Virginia Saba, developer of the CCC system. Approximately two hundred ABC codes were developed from the CCC System of Nursing Interventions to accurately document nursing and integrative health care processes, classify and track clinical care, and develop evidence-based practice models, thus filling significant gaps in older medical code sets." --Connie Koshewa, Practitioner Relations Director, ABC Coding Solutions-Alternative Link "The International Classification for Nursing Practice (ICNPÆ) is a program of the International Council of Nurses (ICN). One of the first steps in the development of the ICNPÆ was to collect and compare all the nursing concepts in existing nursing terminologies, including the CCC. To facilitate the goal of ICNPÆ as a unified nursing language system, a project is under way to map the CCC to the ICNPÆ Version 1.0. This work will facilitate evaluation and ongoing development of both terminologies and allow ICN to compare data using CCC codes with data from other standard nursing terminologies." --Amy Coenen, PhD, RN, FAAN, Director, ICNPÆ Program, International Council of Nurses

Nursing Interventions & Clinical Skills - E-Book-Anne Griffin Perry 2015-01-08 Master nursing skills with this guide from the respected Perry, Potter & Ostendorf author team! The concise coverage in Nursing Interventions & Clinical Skills, 6th Edition makes it easy to master the clinical skills required in everyday nursing practice. Clear guidelines address 159 basic, intermediate, and advanced skills — from measuring body temperature to insertion of a peripheral intravenous device — and step-by-step instructions emphasize the use of evidence-based concepts to improve patient safety and outcomes. Its friendly, easy-to-read writing style includes a streamlined format and an Evolve companion website with review questions and handy checklists for each skill. Coverage of 159 skills and interventions addresses basic, intermediate, and advanced skills you'll use every day in practice. UNIQUE! Using Evidence in Nursing Practice chapter provides the information needed to use evidence-based practice to solve clinical problems. Safe Patient Care Alerts highlight unusual risks in performing skills, so you can plan ahead at each step of nursing care. Delegation & Collaboration guidelines help you make decisions in whether to delegate a skill to unlicensed assistive personnel, and indicates what key information must be shared. Special Considerations indicate additional risks or accommodations you may face when caring for pediatric or geriatric patients, and patients in home care settings. Documentation guidelines include samples of nurses' notes showing what should be reported and recorded after performing skills. A consistent format for nursing skills makes it easier to perform skills, always including Assessment, Planning, Implementation, and Evaluation. A Glove icon identifies procedures in which clean gloves should be worn or gloves should be changed in order to minimize the risk of infection. Media resources include skills performance checklists on the Evolve companion website and related lessons, videos, and interactive exercises on Nursing Skills Online. NEW coverage of evidence-based techniques to improve patient safety and outcomes includes the concept of care bundles, structured practices that have been proven to improve the quality of care, and teach-back, a new step that shows how you can evaluate your success in patient teaching. NEW! Coverage of HCAHPS (Hospital Care Quality Information from the Consumer Perspective) introduces a concept now widely used to evaluate hospitals across the country. NEW! Teach-Back step shows how to evaluate the success of patient teaching, so you can be sure that the patient has mastered a task or consider trying additional teaching methods. NEW! Updated 2012 Infusion Nurses Society standards are incorporated for administering IVs, as well as other changes in evidence-based practice. NEW topics include communication with cognitively impaired patients, discharge planning and transitional care, and compassion fatigue for professional and family caregivers.

Investing in E-Health: People, Knowledge and Technology for a Healthy Future-H. Grain 2014-08-14 As healthcare organisations and governments look to information technology to capitalise and enhance healthcare, the need for effective investment to update existing technology and provide cost-effective infrastructure for the future becomes clear. The issues of defining success and understanding opportunities are crucial to planning optimum investment and the best use of scarce resources. This book presents papers from the Australian Health Informatics Conference (HIC 2014), held in Melbourne, Australia, in August 2014. With the theme of investing in e-health: people, knowledge and technology for a healthy future, the papers delivered at the conference and included here address the issues of building a future-focused, scalable and adaptable infrastructure and of training the healthcare workforce necessary to support it. Subjects covered include: user participation in ICT development for older adults; interactive patient websites; application areas of multi-user virtual environments in the healthcare context; as well as governance, training and assessing the quality of data in public health information systems. The book will be of interest to all those policy makers and practitioners involved in the planning and implementation of information technology projects as part of the healthcare system.

Ethics, Law, and Aging Review, Volume 7-Marshall B. Kapp, JD, MPH, FCLM 2001-09-24 Health care and human service professionals often experience anxiety about potential adverse legal repercussions for actions taken or not taken in the course of caring for patients or clients. In this volume, professionally distinguished and diverse authors discuss both the real and perceived legal liability context within which health and human service delivery to older persons takes place. The benefits and costs of litigious, legislative, and regulatory interventions on the quality of care and the quality of life for recipients of geriatric services is evaluated. Most important, chapters present suggestions for ways to effectively reduce or manage legal risks and anxieties while improving patient care. This volume fills a gap in the literature by providing careful and accurate analysis of legal issues rarely translated into practical and useful advice for health care and human service professionals.

Wound Care at End of Life-Joni Brinker 2018-05-31

Wound Management-Maureen Benbow 2005 This book has been written with the novice in mind, as wound management has become a highly specialised and fascinating field over the past 15 years. This has caused much confusion for practitioners who, in the past, have viewed it as simple ' dressing changes' . It is presented as a compact reference suitable for qualified and unqualified health care workers alike. Firstly, the book aims to positively assist students of healthcare to appreciate the complexity of this vast and growing subject, so that they benefit from a clear presentation of current evidence-based knowledge and become confident enough to apply their new knowledge in practice; secondly, it may be used by qualified practitioners to consolidate their knowledge and so enhance their practice. This is a specialised practice area that transcends all patient groups, specialties and care settings. By working through the content of the book, it is important that the reader develops an understanding of the origins of wound management and how modern wound technology has evolved to reflect those origins. In summary, this book aims to provide a range of health care practitioners with a basic set of tools for starting to personally experience and enjoy the provision of high quality wound management.

Five biological life processes form the book's broad organizational structure Regulation, Cognition, Sensation, Protection, and Motion.

The Checklist Manifesto-Atul Gawande 2010-04-01 The New York Times bestselling author of Better and Complications reveals the surprising power of the ordinary checklist We live in a world of great and increasing complexity, where even the most expert professionals struggle to master the tasks they face. Longer training, ever more advanced technologies—neither seems to prevent grievous errors. But in a hopeful turn, acclaimed surgeon and writer Atul Gawande finds a remedy in the humblest and simplest of techniques: the checklist. First introduced decades ago by the U.S. Air Force, checklists have enabled pilots to fly aircraft of mind-boggling sophistication. Now innovative checklists are being adopted in hospitals around the world, helping doctors and nurses respond to everything from flu epidemics to avalanches. Even in the immensely complex world of surgery, a simple ninety-second variant has cut the rate of fatalities by more than a third. In riveting stories, Gawande takes us from Austria, where an emergency checklist saved a drowning victim who had spent half an hour underwater, to Michigan, where a cleanliness checklist in intensive care units virtually eliminated a type of deadly hospital infection. He explains how checklists actually work to prompt striking and immediate improvements. And he follows the checklist revolution into fields well beyond medicine, from disaster response to investment banking, skyscraper construction, and businesses of all kinds. An intellectual adventure in which lives are lost and saved and one simple idea makes a tremendous difference, The Checklist Manifesto is essential reading for anyone working to get things right.
