U.S. Army Ranger Handbook-U.S. Department of Defense 2019-10-15 From the US Department of Defense, the Skills, Tactics, and Traits of the Most Highly Skilled Soldiers in the World—Army Rangers. This handbook offers the techniques and tactics that make U.S. Army Rangers the best soldiers in the world. These highly trained, easily deployable, and widely skilled infantrymen specialize in airborne assault, raids, recovery of personnel and equipment, and airfield seizure, among other difficult and dangerous missions. Now, in this recently revised edition of the U.S. Army Ranger Handbook, you can get the latest info on everything from understanding the basics of Army operations and tactics to discovering what makes a soldier with good leadership qualities and character. Although primarily written for Rangers and other light infantry units, it serves as a handy reference for all military units, covering how infantry squad- and platoon-sized elements conduct combat operations in varied terrains. Drawing from over two centuries of lessons learned in special operations combat, this guide provides modern soldiers with best training possible. It effectively combines the lessons of the past with important insights for the future to help make army leaders the absolute best they can be. In straightforward, no-frills language, it covers deception, stealth, communications, escape and evasion, ambush operations, perimeter defense, counterintelligence, and much more. This book is the ultimate resource for anyone who wants to know how Rangers think and function.

Manuals Combined: WARRIOR TRAINING CENTER Air Assault School Handbook, 101st Airborne Division (Air Assault) The Sabalauski Air Assault School Handbook & 101st Airborne Division (Air Assault) Gold Book- Air Assault is a combat insertion unit using helicopters to transport and insert soldiers into battle, provide medical evacuation, provide close air support, provide resupply operations. It is usually a company or bat-talion sized element. The term Air Assault derives from two types of operations known as Air Mobility and Vertical Envelopment. Air Mobility Operations were developed by the German Army during WWII in the 1930's. The US Army soon adopted this method of offensive operations in 1941 using wooden gliders. The glider was assisted into the air by being towed by a larger aircraft and then released. The pilot had to navigate the large glider loaded with a team of infantry soldiers to the landing zone behind enemy lines, at night and attempt to land safely. Once the pilot landed the glider, he would join the mission as another infantry soldier with the team that he flew in. Although the gliders and techniques used were advanced for that time period they did pose some disadvantages. Once the aircraft was landed safely that team of soldiers were cut off from allied troops. Pilots had to be cross trained with infantry tactics so he could operate as both roles. The air mobility glider was abandoned after WWII after the invention of the helicopter.

PREFACE 1 November 2011 1. The Sabalauski Air Assault School (TSAAS) is a FORSCOM TDA unit that trains leaders and Soldiers assigned to the 101st Airborne Division (Air Assault), as well as other Army units and armed services in several courses. By conducting the Air Assault and Pathfinder Courses The Sabalauski Air Assault School develops technically proficient and confident Soldiers capable of safely executing immediate and sustained air assault operations. The school also trains and qualifies military Rappel Masters, Fast Rope Masters and SPIES Masters in the application of infiltration and extraction techniques. The school provides quality basic airborne refresher and jumpmaster refresher training to airborne capable units. Finally, the school provides command and control of the 101st Airborne Division (Air Assault), Screaming Eagle Parachute Team. 2. This handbook is designed to facilitate the mission of the school, serving as a baseline of information for the Air Assault Course. It is not a substitute for applicable Army regulations, field manuals, training circulars, or technical manuals, but it is designed to complement the guidance in these publications in the area of air assault operations. The 101st Airborne Division (Air Assault) disclaims any responsibility for incidents occurring while applying these procedures. 3. The proponent for this handbook is the Commander of The Sabalauski Air Assault School. This 2011 update provides users with the latest doctrinal information regarding Air Assault Operations. Users of this publication are encouraged to recommend improvements or changes in writing to ACofS, G3/5/7/DPTM; ATTN: AFZB-K-GT-AA, Fort Campbell, KY 42223-5000. The 101st Airborne Division (Air Assault) has a long and rich heritage. As the world's only functional Air Assault Division, the 101st Airborne has pioneered the development of Air Assault tactics, techniques and procedures (TTPs). These tactics were quantifiably demonstrated in 1991 during Operation Desert Storm and most recently during Operation Enduring Freedom and Operation Iraqi Freedom. We are currently at war with dangerous and adaptive terrorist forces in complex environments. In response, the Division continually refines its TTPs, exploiting our unique capabilities to defeat our nation's enemies. This reference publication, The Gold Book June 2014, re-establishes the baseline for the planning and execution of Air Assault operations.

Field Manual FM 3-99 Airborne and Air Assault Operations March 2015-United States Government US Army 2015-03-29 This publication, Army Field Manual FM 3-99 Airborne and Air Assault Operations establishes doctrine to govern the activities and performance of Army forces in forcible entry (specifically airborne and air assault operations) and provides the doctrinal basis for vertical envelopment and follow-on operations. This publication provides leaders with descriptive guidance on how Army forces conduct vertical envelopment within the simultaneous combination of offense, defense, and stability. These doctrinal principles are intended to be used as a guide and are not to be considered prescriptive. FM 3-99 encompasses tactics for Army airborne and air assault operations and describes how commanders plan, prepare, and conduct airborne and air assault operations by means of joint combined arms operations. This publication supersedes FM 90-26, Airborne Operations and Army Tactics, Techniques, and Procedures 3-18.12, Air Assault Operations. To comprehend the doctrine contained in this publication, readers must first understand the principles of war, the nature of unified land operations, and the links between the operational and tactical levels of war described in Joint Publication (JP) 3-0, Army Doctrine Publication (ADP) 3-0, and Army Doctrine Reference Publication (ADRP) 3-0. The reader must understand the fundamentals of the operations process found in ADP and ADRP 5-0 associated with the conduct of offensive and defensive tasks contained in FM 3-90-1 and reconnaissance, security, and tactical enabling tasks contained in FM 3-90-2. In addition the reader must also fully understand the principles of mission command as described in ADP 6-0 and ADRP 6-0 and command and staff organization and operations found in FM 6-0. The principal audience for FM 3-99 is the commanders, staff, officers, and noncommissioned officers (NCOs) of the brigade, battalions, and companies within the brigade combat team. The audience also includes the United States Army Training and Doctrine Command institutions and components, and the United States Army Special Operations Command. It serves as an authoritative reference for personnel developing doctrine, materiel and force structure, institutional and unit training, and standard operating procedures (SOPs) for airborne or air assault operations. This publication applies to the Active Army, the Army National Guard/Army National Guard of the United States, and the United States Army Reserve unless otherwise stated.

Multiservice Helicopter Sling Load-Coast Guard 2019-06-21 Multiservice Helicopter Sling Load: Basic Operations And Equipment COMDTINST M13482.2B; TM 4-48.09 (FM 4-20.197); MCRP 4-11.3E; NTTP 3-04.11; AFMAN 11-223 On the Cover: K9 Piper is one of the very special dogs that keep airports safe. You can find Piper's social media accounts by searching: @airportsk9. This manual is one of a series of manuals for aviation and ground personnel who perform helicopter sling load missions ashore or aboard ship. These manuals are a coordinated effort of the US Army, US Marine Corps, US Navy, US Air Force, and US Coast Guard. All services participate in the sling load certification program begun by the Army in 1984. These manuals include standardized rigging procedures and other information from that program. Efforts were made to standardize ground crew and hookup procedures and terminology. The terms "helicopter" and "aircraft" refer to vertical lift aircraft that participate in sling load operations. Where service-unique requirements apply to an entire chapter or body of text, the service initials are at the beginning of the chapter or text. Otherwise the initials are at the end of the applicable sentence. The information in this manual will familiarize personnel with the sling sets, cargo nets, and other sling load equipment in the DOD inventory. It will also acquaint them with the helicopters used for sling load and provide basic procedures for rigging and hooking up loads. Rigging equipment and procedures described in this manual may not be authorized for all aircraft or services because of equipment or service restrictions. This manual does not provide details on aviation operations nor does it present detailed data that is normally contained in unit standing operating procedures (SOPs). Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-

pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. <https://usgovpub.com>
