The Oxford Handbook of Transnational Feminist Movements-Rawwida Baksh-Soodeen 2015 The Oxford Handbook of Transnational Feminist Movements explores the historical, political, economic and social contexts in which transnational feminist movements have emerged and spread, and the contributions they have made to global knowledge, power and social change over the past half century. The publication of the handbook in 2015 marks the fortieth anniversary of the United Nations International Women's Year, the thirtieth anniversary of the Third World Conference on Women held in Nairobi, the twentieth anniversary of the Beijing Declaration and Platform for Action, and the fifteenth anniversaries of the Millennium Development Goals and of UN Security Council Resolution 1325 on 'women, peace and security'. The editors and contributors critically interrogate transnational feminist movements from a broad spectrum of locations in the global South and North: feminist organizations and networks at all levels (local, national, regional, global and 'glocal'); wider civil society organizations and networks; governmental and multilateral agencies; and academic and research institutions, among others. The handbook reflects candidly on what we have learned about transnational feminist movements. What are the different spaces from which transnational feminisms have operated and in what ways? How have they contributed to our understanding of the myriad formal and informal ways in which gendered power relations define and inform everyday life? To what extent have they destabilized or transformed the global hegemonic systems that constitute patriarchy? From a position of fifty years of knowledge production, activism, working with institutions, and critical reflection, the handbook recognizes that transnational feminist movements form a key epistemic community that can inspire and provide leadership in shaping political spaces and institutions at all levels, and transforming international political economy, development and peace processes. The handbook is organized into ten sections, each beginning with an introduction by the editors. The sections explore the main themes that have emerged from transnational feminist movements: knowledge, theory and praxis; organizing for change; body politics, health and well-being; human rights and human security; economic and social justice; citizenship and statebuilding; militarism and religious fundamentalisms; peace movements, UNSCR 1325 and postconflict rebuilding; feminist political ecology; and digital-age transformations and future trajectories.

Globalization, Prostitution and Sex Trafficking-Elina Penttinen 2007-08-07 Globalization has been traditionally interpreted as a phenomenon that takes place at the macro level and is determined by states and markets. This volume takes a different approach to understanding globalization, showing how through the global sex trade, globalization is embodied and enacted by individuals. Elina Penttinen illustrates how the global sex industry feeds on complex global flows. Drawing on extensive fieldwork on the trafficking of Russian and Baltic female sex workers, she demonstrates how the embodiment and reiteration of globalization on the bodies of gendered individuals are tied to the larger processes of globalization. Appadurai's framework of landscapes of globalization is developed into a framework of shadow sexscapes in order to show how the global sex industry feeds on complex global flows and in turn operates as a form of shadow globalization. Globalization, Prostitution and Sex Trafficking will be of interest to students and researchers of international relations, globalization and gender studies.

Sexing the Caribbean-Kamala Kempadoo 2004 The primary focus of the book is to illuminate intersections of gender, sexuality, work, race and economic relations in the Caribbean.

Human Trafficking-Louise Shelley 2010-07-29 This book examines all forms of human trafficking globally, revealing the operations of the trafficking business and the nature of the traffickers themselves. Using a historical and comparative perspective, it demonstrates that there is more than one business model of human trafficking and that there are enormous variations in human trafficking in different regions of the world. Drawing on a wide body of academic research - actual prosecuted cases, diverse reports and field work and interviews conducted by the author over the last sixteen years in Asia, Latin America, Africa, Europe and the former socialist countries - Louise Shelley concludes that human trafficking will grow in the twenty-first century as a result of economic and demographic inequalities in the world, the rise of conflicts and possibly global climate change. Coordinated efforts of government, civil society, the business community, multilateral organizations and the media are needed to stem its growth.

Modern Slavery-Siddharth Kara 2017-10-10 Siddharth Kara is a tireless chronicler of the human cost of slavery around the world. He has documented the dark realities of modern slavery in order to reveal the degrading and dehumanizing systems that strip people of their dignity for the sake of profit—and to link the suffering of the enslaved to the day-to-day lives of consumers in the West. In Modern Slavery, Kara draws on his many years of expertise to demonstrate the astonishing scope of slavery and offer a concrete path toward its abolition. From labor trafficking in the U.S. agricultural sector to sex trafficking in Nigeria to debt bondage in the Southeast Asian construction sector to forced labor in the Thai seafood industry, Kara depicts the myriad faces and forms of slavery, providing a comprehensive grounding in the realities of modern-day servitude. Drawing on sixteen years of field research in more than fifty countries around the globe—including revelatory interviews with both the enslaved and their oppressors—Kara sets out the key manifestations of modern slavery and how it is embedded in global supply chains. Slavery offers immense profits at minimal risk through the exploitation of vulnerable subclasses whose brutalization is tacitly accepted by the current global economic order. Kara has developed a business and economic analysis of slavery based on metrics and data that attest to the enormous scale and functioning of these systems of exploitation. Beyond this data-driven approach, Modern Slavery unflinchingly portrays the torments endured by the powerless. This searing exposé documents one of humanity's greatest wrongs and lays out the framework for a comprehensive plan to eradicate it.

The Industrial Vagina-Sheila Jeffreys 2008-11-19 The industrialization of prostitution and the sex trade has created a multibillion-dollar global market, involving millions of women, that makes a substantial contribution to national and global economies. The Industrial Vagina examines how prostitution and other aspects of the sex industry have moved from being small-scale, clandestine, and socially despised practices to become very profitable legitimate market sectors that are being legalised and decriminalised by governments. Sheila Jeffreys demonstrates how prostitution has been globalized through an examination of: the growth of pornography and its new global reach the boom in adult shops, strip clubs and escort agencies military prostitution and sexual violence in war marriage and the mail order bride industry the rise in sex tourism and trafficking in women. She argues that through these practices women's subordination has been outsourced and that states that legalise this industry are acting as pimps, enabling male buyers in countries in which women's equality threatens male dominance, to buy access to the bodies of women from poor countries who are paid for their sexual subservience. This major and provocative contribution is essential reading for all with an interest in feminist, gender and critical globalisation issues as well as students and scholars of international political economy.

Globalization and Crime-Katja Franko Aas 2013-04-30 Globalization & Crime brings together the closely related subjects of criminology and global sociology. Ideal for upper-level undergraduate and postgraduate students, it examines established topics such as human trafficking and smuggling, migration and organised crime. It also delves into new territory and explores the issues surrounding international criminal justice, comparative criminology, green criminology and human rights. New to this Second Edition is a chapter dedicated to the impact that the war on terror has had on the rule of law and a detailed discussion on the growing topic of cosmopolitan criminology. Complete with extensive references, helpful suggestions for further reading and a detailed glossary, this book will prove essential reading for students and academics in criminology, globalization, sociology and other social sciences. The Key Approaches to Criminology series celebrates the removal of traditional barriers between disciplines and, specifically, reflects criminology's interdisciplinary nature and focus. It brings together some of the leading scholars working at the intersections of criminology and related subjects. Each book in the series helps readers to make intellectual connections between criminology and other discourses, and to understand the importance of studying crime and criminal justice within the context of broader debates. The series is intended to have appeal across the entire range of undergraduate and postgraduate studies and beyond, comprising books which offer introductions to the fields as well as advancing ideas and knowledge in their subject areas.

and Christine White examines the legal, socio-cultural, historical, and political aspects of human trafficking and modern-day slavery. While most texts only cover sex trafficking and labor trafficking, this text takes a more inclusive approach, provide coverage of what is currently known about organ trafficking, child marriage, and child soldiers as well. These topics are explored within the borders of the United States as well as across the world. The reality is that this problem is not limited to one country or, even, one continent. Technology and globalization have made this an international crisis that requires a collaborative and cooperative international response. The goal of this text is to provide an accurate understanding of all forms of human trafficking and current responses to this crime. Disposable People-Kevin Bales 2012 "Slavery is illegal throughout the world, yet more than twenty-seven million people are still trapped in one of history's oldest social institutions. Kevin Bale's disturbing story of slavery today reaches from brick kilns in Pakistan and brothels in Thailand to the offices of multinational corporations and beyond. The current slaves are not a long-term investment as was true with older forms of slavery, explains Bales. Instead they are cheap, require little care, and are disposable. This edition is updated with a stunning new preface that traces the changes in global slavery and abolition since the book was first published over ten years ago."--Back cover.

Globalization and Human Rights in the Developing World-Derrick M. Nault 2011-07-12 Focusing on world regions where human rights abuses are the most serious, extensive and sustained; this book fills a crucial gap in our knowledge of the difficulties and promise of promoting human rights in our global age.

Human Trafficking and Globalization-Ann Jordan 2004

Deviant Globalization-Nils Gilman 2011-03-24 >

Understanding Global Slavery-Kevin Bales 2005-11-07 Slavery continues as a blight on the human world, with an estimated 27 million people around the world in bondage. Kevin Bales undertakes a discussion of the causes of enslavement & the socio-economic factors that sustain slavery in the 21st century.

Human Trafficking-Natividad Gutiérrez Chong 2017-09-13 In the post-Cold War era, economic globalization has resulted in the buying and selling of human beings. Poverty, social instability, lawlessness, gender biases, and ethnic hostility have entrapped millions in the world of modern day slavery, with the result that human trafficking is one of the fastest growing criminal industries in the world. Every year, men, women, and children from across the globe are transported within or across borders for the purpose of forced labor and sexual exploitation. Despite the plethora of journalistic articles written on human trafficking there is a need for more rigorous academic analysis of the phenomenon. Although groups from many different ideologies have embraced policies to end human trafficking, there are still many gaps and unanswered questions, particularly with regard to the amount of, and nature of the phenomenon. This book provides an insight into the complexity of human trafficking by addressing both how the scope of globalization impacts the sex industry and forced labor, and how vulnerability is a growing cause of human trafficking, affecting traditional diasporic and migratory patterns. This book was originally published as a special issue of the Journal of Intercultural Studies.

Human Trafficking-Maggy Lee 2013-01-11 Human Trafficking provides a critical engagement with the key debates on human trade. It addresses the subject within the broader context of global crime and the internationalisation of crime control. The book takes a broadly discursive approach and draws on historical, comparative as well as the latest empirical material to illustrate and inform the discussion of the major trends in human trafficking. The book helps to develop fresh theoretical insights into globalisation, exclusion and governance, and identifies a new research agenda that will ensure the book is of interest to advanced level students as well as academic scholars.

The New Faces of Victimhood-Rianne Letschert 2011-01-21 Besides generating wealth, globalization makes victims, including victims of new forms of crime. In this edited book of scholarly essays, international lawyers and criminologists reflect on the legal challenges posed by these dark sides of globalization. Examples include transnational organised crime, human trafficking and corruption, cyber crimes, international terrorism, global corporate crime and cross-border environmental crimes. The authors reflect on the limits of domestic systems of justice in providing protection, empowerment and redress to the victims of these emerging forms of global insecurity. They argue for the need of better international or supra-national institutional arrangements such as legal instruments and actions of the United Nations or regional organizations such as the European Union. In part I Jan Van Dijk and Rianne Letschert present an overview of trends in criminal victimization against the backdrop of globalization using a unique set of statistical indicators. By placing this issue in the framework of the human security concept, the authors draw out its broader political and normative implications. Theologist Ralf Bodelier explains how modern communication technologies have heightened sensitivities among the general public for human insecurities anywhere in the world. In his view, a new global conscience is in the making that may become the cornerstone of international solidarity and action. Marc Groenhuijsen and Rianne Letschert describe the emergence of national and international legal and institutional arrangements to offer remedies to victims of crime in an era of globalization. In part II a selection of experts analyse the specific issues surrounding the protection and empowerment of victims of different types of international crimes such as human trafficking, organised crime/corruption, terrorism, global corporate crime and cross border environmental crimes. In part III focused attention is given to the special challenges and opportunities of protecting and assisting crime victims in cyberspace. Part IV deals with emerging victim issues in humanitarian law such as the accountability of private military companies and the implementation of the ambitious victim provisions in the statute of the International Criminal Court including the establishment of a global fund for reparations. In the final part of the book some of its core authors formulate their ideas about the international institutional arrangements that should be put in place to offer justice to the victims of globalization. A concrete proposal is made for the transformation of the United Nations 1985 Declaration on the Principles of Justice for Victims of Crime and Abuse of Power into a full-fledged UN convention. In the final chapter further proposals are made for the increased involvement of regional organisations such as the European Union in the protection of victims of global crime.

From Human Trafficking to Human Rights-Alison Brysk 2012-01-31 Over the last decade, public, political, and scholarly attention has focused on human trafficking and contemporary forms of slavery. Yet as human rights scholars Alison Brysk and Austin Choi-Fitzpatrick argue, most current work tends to be more descriptive and focused on trafficking for sexual exploitation. In *From Human Trafficking to Human Rights*, Brysk, Choi-Fitzpatrick, and a cast of experts demonstrate that it is time to recognize human trafficking as more a matter of human rights and social justice, rooted in larger structural issues relating to the global economy, human security, U.S. foreign policy, and labor and gender relations. Such reframing involves overcoming several of the most difficult barriers to the development of human rights discourse: women's rights as human rights, labor rights as a confluence of structure and agency, the interdependence of migration and discrimination, the ideological and policy hegemony of the United States in setting the terms of debate, and a politics of global justice and governance. Throughout this volume, the argument is clear: a deep human rights approach can improve analysis and response by recovering human rights principles that match protection with empowerment and recognize the interdependence of social rights and personal freedoms. Together, contributors to the volume conclude that rethinking trafficking requires moving our orientation from sex to slavery, from prostitution to power relations, and from rescue to rights. On the basis of this argument, *From Human Trafficking to Human Rights* offers concrete policy approaches to improve the global response necessary to end slavery responsibly.

Sex Trafficking-Siddharth Kara 2017-08-29 "The best book ever written on human trafficking for sexual exploitation"—the basis for the feature film, *Trafficked*, starring Ashley Judd (Kevin Bales, president of Free the Slaves). Every year, hundreds of thousands of women and children are abducted, deceived, seduced, or sold into forced prostitution. These trafficked sex slaves form the backbone of one of the world's most profitable illicit enterprises and generate huge profits for their exploiters, for unlike narcotics, which must be grown, harvested, refined, and packaged, sex slaves require no such "processing," and can be repeatedly "consumed." In this book, Kara provides a riveting account of his four-continent journey into this unconscionable industry, sharing the moving stories of its

victims and revealing the shocking conditions of their exploitation. He draws on his background in finance, economics, and law to provide the first ever business analysis of contemporary slavery worldwide, focusing on its most profitable and barbaric form: sex trafficking. Kara describes the local factors and global economic forces that gave rise to this and other forms of modern slavery over the past two decades and quantifies, for the first time, the size, growth, and profitability of each industry. Finally, he identifies the sectors of the sex trafficking industry that would be hardest hit by specifically designed interventions and recommends the specific legal, tactical, and policy measures that would target these vulnerable sectors and help to abolish this form of slavery, once and for all. The author will donate a portion of the proceeds of this book to the anti-slavery organization, Free the Slaves. "Sex trafficking is more of a problem than most people realize. Read this well-written book and find out."—Kirk Douglas

Human Trafficking-John Winterdyk 2011-12-05 Human trafficking is a crime that undermines fundamental human rights and a broader sense of global order. It is an atrocity that transcends borders—with some regions known as exporters of trafficking victims and others recognized as destination countries. Edited by three global experts and composed of the work of an esteemed panel of contributors, *Human Trafficking: Exploring the International Nature, Concerns, and Complexities* examines techniques used to protect and support victims of trafficking as well as strategies for prosecution of offenders. Topics discussed include: How data on human trafficking should be collected and analyzed, and how data collection can be improved through proper contextualization The importance of harmonization and consistency in legal definitions and interpretations within and among regions The need for increased exchange of information and cooperation between the various actors involved in combating human trafficking, including investigators, law enforcement and criminal justice professionals, and social workers Problems with victim identification, as well as erroneous assumptions of the scope of victimization Controversy over linking protection measures with cooperation with authorities Highlighting the issues most addressed by contemporary scholars, researchers, practitioners, and policy-makers, this volume also suggests areas ripe for further inquiry and investigation. Supplemented by discussion questions in each chapter, the book is sure to stimulate debate on a troubling phenomenon.

Combating Trafficking in South-East Asia-Annuska Derks 2000 During the past decade, trafficking has become an issue of growing concern in South-East Asia. It has been conservatively estimated that at least 200-225,000 women and children from South-East Asia are trafficked annually, a figure representing nearly one-third of the global trafficking trade. South-East Asia is the most significant source region for the 45-50,000 women and children estimated to be trafficked into the US each year, with 30,000 coming from South-East Asia. This study reviews what is known about trafficking in the region, providing a systematic overview of the variety of responses that.

The International Politics of Human Trafficking-Gillian Wylie 2016-09-01 This book explores the international politics behind the identification of human trafficking as a major global problem. Since 2000, tackling human trafficking has spawned new legal, security and political architecture. This book is grounded in the premise that the intense response to this issue is at odds with the shaky statistics and contentious definitions underpinning it. Given the disparity between architecture and evidence, Wylie asks why human trafficking has become widely understood as a threat to personal and state security in today's world. Relying on the idea of 'norm lifecycle' from constructivist International Relations, this volume traces the rise and impact of anti-trafficking activism. Global common knowledge about trafficking is now established, but at a cost. Taking issue with the predominant framing of trafficking as sexual exploitation, this book focuses on how contemporary globalization causes labour exploitation, while the concept of trafficking legitimates states' securitized responses to migration. Globalization and Third World Women-Ligaya Lindio-McGovern 2016-04-22 Adopting the notion of 'third world' as a political as well as a geographical category, this volume analyzes marginalized women's experiences of globalization. It unravels the intersections of race, culture, ethnicity, nationality and class which have shaped the position of these women in the global political economy, their cultural and their national history. In addition to a thematically structured and highly informative investigation, the authors offer an exploration of the policy implications which are commonly neglected in mainstream literature. The result is a must have volume for sociological academics, social policy experts and professionals working within non-governmental organizations.

Handbook of Globalisation and Development-Kenneth A. Reinert 2017-03-31 Characterised by conceptual diversity, the *Handbook of Globalisation and Development* presents contributions from prominent international researchers on all aspects of globalisation and carefully considers their role across a whole host of development processes. The Handbook is structured around seven key areas: international trade, international production, international finance, migration, foreign aid, a broader view, and challenges. Adopting a multi-disciplinary approach, the section on 'a broader view' delves into dimensions of globalisation and development that go beyond the mere economic, such as: culture, technology, health, and poverty. Carefully crafted, the chapters herein offer a rigorous and comprehensive assessment of the available research to date and provide an assessment of policy options across all areas considered.

The Cultural Politics of European Prostitution Reform-Greggor Mattson 2016-01-28 *The Cultural Politics of European Prostitution Reform* traces case studies of four European Union countries to reveal the way anxieties over globalization translates into policies to recognize sex workers in some countries, punish prostitutes' clients in others, and protect victims of human trafficking in them all.

Human Trafficking and Human Security-Anna Jonsson 2012-08-06 Human trafficking, and the related problems of organised crime and prostitution, has become a serious problem for post-Soviet countries since the dissolution of the Soviet Union. Human trafficking has a major impact on the countries of origin, the destination countries and the countries of transit, and is a concern for those studying population and migration, economics, politics, international relations and security studies. This book examines human trafficking from post-Soviet countries, exploring the full extent of the problem and discussing countermeasures, both local and at the global level, and considering the problem in all its aspects. It focuses in particular on the experiences of the Baltic Sea region, setting out the nature of organised crime and the full range of threats against society.

International Trade and Wage Discrimination-Yana van der Meulen Rodgers 2003 This study explores the impact of competition from international trade on wage discrimination by sex in two highly open economies. If discrimination is costly, as posited in neoclassical theory based on Becker (1959), then increased industry competitiveness from international trade reduces the incentive for employers to discriminate against women. Alternatively, increased international trade may contribute to employment segregation and reduced bargaining power for women to achieve wage gains. The approach centers on comparing the impact of international trade on wage discrimination in concentrated and nonconcentrated sectors. The effect of international trade competition is expected to be more pronounced in concentrated sectors, where employers can use excess profits in the absence of trade to cover the costs of discrimination. Wage discrimination is proxied by the portion of the wage gap that cannot be explained by observable skill differences between men and women. The empirical model is estimated using a rich panel data set of residual wage gaps, trade ratios, and alternative measures of domestic concentration for Taiwan (China) and the Republic of Korea during the 1980s and 1990s. Results indicate that in contrast to the implications of neoclassical theory, competition from foreign trade in concentrated industries is positively associated with wage discrimination. These results imply that concerted efforts to enforce equal pay legislation and apply effective equal opportunity legislation are crucial for ensuring that women's pay gains will match those of men in a competitive environment. This paper--a product of the Gender Division, Poverty Reduction and Economic Management Network--is part of a larger effort in the network to understand the impact of trade on labor markets.

Trafficking and Global Crime Control-Maggy Lee 2011 This authoritative work examines key issues and debates on sex and labor trafficking, drawing on theoretical, empirical, and comparative material to inform the discussion of major trends and future directions. The text brings together key criminological and sociological literature on migration studies, gender, globalization, human rights, security, victimology, policing, and control to provide the most complete overview available on the subject.

Illicit-Moises Naim 2006-10-10 A groundbreaking investigation of how illicit commerce is changing the world by transforming economies, reshaping politics, and capturing governments. In this fascinating and comprehensive examination of the underside of globalization, Moises Naím illuminates the struggle between traffickers and the hamstrung bureaucracies trying to control them. From illegal migrants to drugs to weapons to laundered money to counterfeit goods, the black market produces enormous profits that are reinvested to create new businesses, enable terrorists, and even to take over governments. Naím reveals the inner workings of these amazingly efficient international organizations and shows why it is so hard — and so necessary to contain them. Riveting and deeply informed, *Illicit* will change how you see the world around you. From the Trade Paperback edition.

The Political Economy of Violence Against Women-Jacqui True 2012-09-06 Violence against women is a major problem in all countries, affecting women in every socio-economic group and at every life stage. Yet, when women enjoy good social and economic status they are less vulnerable to violence across all societies.

This book develops a political economy approach to understanding violence against women - from the household to the transnational level - accounting for its globally increasing scale and brutality.

Human Trafficking, Human Misery-Alexis A. Aronowitz 2009 This volume takes a global perspective and uses first-hand accounts and stories to examine the problem of human trafficking in its various manifestations around the world.

Globalization and Human Rights-Alison Brysk 2002-10-15 In this landmark volume, Alison Brysk has assembled an impressive array of scholars to address new questions about globalization and human rights. Is globalization generating both problems and opportunities? Are new problems replacing or intensifying state repression? How effective are new forms of human rights accountability? These essays include theoretical analyses by Richard Falk, Jack Donnelly, and James Rosenau. Chapters on sex tourism, international markets, and communications technology bring new perspectives to emerging issues. The authors investigate places such as the Dominican Republic, Nigeria, and the Philippines. The contemporary world is defined by globalization. While global human rights standards and institutions have been established, assaults on human dignity continue. These essays identify the new challenges to be faced, and suggest new ways to remedy the costs of globalization.

The Dark Side of Globalization-Jorge Heine 2011 "This remarkably fine book constitutes the elegant bridge between academic theorizing about globalization and the inspired anecdotage of Thomas Friedman." Tom Farer, University Professor and past Dean, Josef Korbel School of International Studies, University of Denver "Indispensable reading for anyone who wants to understand the full range of contents and discontents caused by globalization." Thomas G. Weiss, Director, Ralph Bunche Institute of International Studies, CUNY; and past president, International Studies Association Seen by some as a desirable and irreversible engine of prosperity and progress, globalization is resisted by others as the soft underbelly of a corporate imperialism that plunders and profiteers in the global marketplace. Globalization has brought many benefits, including the reduction of poverty in several countries. But it also has a dark side: the unleashing of negative forces as a result of the compression of time and space made possible by modern technology. Examples include the transnational flows of terrorism, drug and human trafficking, organized crime, money laundering, and global pandemics. How do these various expressions of "uncivil society" manifest themselves? How do they exploit the opportunities offered by globalization? How can governments, international organizations and civil society deal with the problem? From arms trafficking in West Africa through armed insurgencies in South Asia and the upsurge of jihad in the age of globalization, this book examines the challenges that the dark forces of globalization pose to the international system and the responses they have triggered. Written largely by authors from developing countries, the book's goal is to help maximize the beneficial consequences of globalization while muting its baleful effects.

Data and Research on Human Trafficking-Frank Laczko 2005 During the last decade there has been a considerable increase in the number of studies about human trafficking. This review of research and data on trafficking shows that despite the growing literature on trafficking around the world, relatively few studies are based on extensive or empirical research, and information on the actual numbers of people trafficked remains very sketchy. The book, which includes 9 regional chapters, and 3 chapters dealing with methodological issues, suggests a number of ways in which to enhance research and data on human trafficking. These papers were first discussed at an international conference sponsored by the Italian Government, held in Rome in May 2004.

Globalization and Transnational Surrogacy in India-Sayantani DasGupta 2014-02-14 This edited volume explores transnational gestational surrogacy and how its practice is changing the traditional concept of parenthood across the globe. The phenomenon has given rise to a thriving international industry where money is being 'legally' exchanged for babies and 'reproductive labor' has taken on a lucrative commercial tone. This interdisciplinary collection of essays addresses significant issues in commercial gestational surrogacy as it plays out in a peculiar relation between the United States and India.

The Security Implications of Human Trafficking-Jamille Bigio 2019-09-30 Human trafficking is a criminal and security concern: it can fuel conflict, drive displacement, and undercut the ability of international institutions to promote peace and stability. The United States and its allies should take steps to reduce human trafficking in conflict and terrorism-affected contexts while promoting broader peace and stability.

Preventing Human Trafficking-Robert W. Spires 2015-03-28 This book explores human trafficking, examining the work of grass-roots, non-profit organizations who educate and rehabilitate human trafficking victims and at-risk youth. Through interviews with staff and children, the author compares the work of two NGOs on-the-ground in Thailand with the work of similar organizations overseas, shedding light on the ways in which they combine educational work with shelter settings to prevent human trafficking, protect young people and attempt to provide a future free of exploitation. Concentrating less on the details of exploitation itself than the work that is being done to prevent exploitation and protect those who have experienced human trafficking, Preventing Human Trafficking explores the many challenges faced by the organizations, their staff and the children they serve. Drawing on rich qualitative research to address significant gaps in our knowledge of the work of NGOs and propose solutions to the problems of trafficking and how to protect its victims, this book will appeal to social scientists and policy makers with interests in criminology, exploitation, people trafficking, non-formal education and the work of NGOs.

Economies of Violence-Jennifer Suchland 2015-07-23 Recent human rights campaigns against sex trafficking have focused on individual victims, treating trafficking as a criminal aberration in an otherwise just economic order. In Economies of Violence Jennifer Suchland directly critiques these explanations and approaches, as they obscure the reality that trafficking is symptomatic of complex economic and social dynamics and the economies of violence that sustain them. Examining United Nations proceedings on women's rights issues, government and NGO anti-trafficking policies, and campaigns by feminist activists, Suchland contends that trafficking must be understood not solely as a criminal, gendered, and sexualized phenomenon, but as operating within global systems of precarious labor, neoliberalism, and the transition from socialist to capitalist economies in the former Soviet Union and Eastern Bloc. In shifting the focus away from individual victims, and by underscoring trafficking's economic and social causes, Suchland provides a foundation for building more robust methods for combatting human trafficking.
