The book has a simple and exhaustive approach to topics like automata theory, formal languages and theory of computation. These descriptions are followed by numerous relevant examples related to the topic. A brief introductory chapter on compilers explaining its relation to theory of computation is also given.
India Infrastructure Report 2012-Idfc Foundation 2016-04-08 Today, India’s education sector remains a victim of poor policies, restrictive regulations and orthodoxy. Despite being enrolled in schools, children are not learning adequately. Increasingly, parents are seeking alternatives through private inputs in school and tuition. Students are dropping out from secondary school in spite of high financial returns of secondary education, and those who do complete it have inferior conceptual knowledge. Higher education is over-regulated and under-governed, keeping away serious private providers and reputed global institutes. Graduates from high schools, colleges and universities are not readily employable, and few are willing to pay for skill development. Ironically, the Right to Education Act, if strictly enforced, will result in closure of thousands of non-state schools, and millions of poor children will be left without access to education. Eleventh in the series, India Infrastructure Report 2012 discusses challenges in the education sector — elementary, secondary, higher, and vocational — and explores strategies for constructive change and opportunities for the private sector. It suggests that immediate steps are required to reform the sector to reap the benefits from India’s ‘demographic dividend’ due to a rise in the working age population. Result of a collective effort led by the IDFC Foundation, this Report brings together a range of perspectives from academics, researchers and practitioners committed to enhancing educational practices. It will be an invaluable resource for policymakers, researchers and corporates.

Theos Bernard, the White Lama-Paul G. Hackett 2012-05-01 The life and adventures of an American explorer and iconic figure in the 20th century religious counterculture movement. In 1937, Theos Casimir Bernard, the self-proclaimed “White Lama,” became the third American in history to reach Lhasa, the capital city of Tibet. During his stay, he amassed the largest collection of Tibetan texts, art, and artifacts in the Western hemisphere at that time. He also documented, in both still photography and 16mm film, the age-old civilization of Tibet on the eve of its destruction by Chinese Communists. Based on thousands of primary sources and rare archival materials, this is the real story behind the purported adventures of Bernard and his role in the growth of America’s religious counterculture. Over the course of his brief life, Bernard met, associated, and corresponded with the major social, political, and cultural leaders of his day, from the Regent and high politicians of Tibet to saints, scholars, and diplomats of British India, from Charles Lindbergh and Franklin Delano Roosevelt to Gandhi and Nehru. Although hailed as a brilliant pioneer by the media, Bernard also had his flaws. He was an entrepreneur propelled by grandiose schemes, a handsome man who shamelessly used his looks to bounce from rich wife to rich wife in support of his activities, and a master manipulator who concocted his own interpretation of Eastern wisdom to suit his ends. Bernard had a bright future before him but disappeared in India during the communal violence of the 1947 Partition, never to be seen again. “Well-written...A readable intellectual account of the life of an ambitious Tibetological pioneer.”—Asian Ethnology

Principles of Economics-A. Marshall 2013-12-05 Alfred Marshall, Principles of Economics (1890) - Founder of Modern (Neo-classical) Economics. His book Principles of Economics was the dominant textbook in economics for a long time and it is considered to be his seminal work.
The World Trade System-Jagdish N. Bhagwati 2016-12-12 Leading trade experts examine the world trading system today, from the multilateralism of the WTO to explosive bilateralism and the mega-regionals TPP and TTIP. When the General Agreement on Tariffs and Trade (GATT) metamorphosed into the World Trade Organization (WTO) in 1994, it seemed that the third pillar of the international economic superstructure was finally in place. And yet with the failure of member countries to close the Doha Round of trade negotiations and the emergence of bilateral and plurilateral preferential trade arrangements (PTAs) such as the Trans-Pacific Partnership (TPP), the future of the multilateral WTO seems uncertain. In this volume, leading economists examine issues in trade policy that have arisen during this shift. The contributors discuss such topics as the effect of trade on poverty and inequality, PTAs and litigation between trading partners, the WTO Trade Facilitation Agreement, and the relationship of food security and trade liberalization. They also offer regional perspectives on the TPP and trans-Atlantic free trade. Contributors Rahel Aichele, Jagdish Bhagwati, Steve Charnovitz, Gabriel Felbermayr Dimitar Gueorguiev, Bernard Hoekman, Jonas Kasteng, Pravin Krishna, Mary Lovely, Petros Mavroidis, Devashish Mitra, Arvind Panagariya, Tom Prusa, Andre Sapir, Stefan Tangermann

Jugaad Innovation-Navi Radjou 2012-04-10 "Jugaad Innovation is the most comprehensive book yet to appear on the subject [of frugal innovation]." —The Economist A frugal and flexible approach to innovation for the 21st century Innovation is a key directive at companies worldwide. But in these tough times, we can't rely on the old formula that has sustained innovation efforts for decades—expensive R&D projects and highly-structured innovation processes. Jugaad Innovation argues the West must look to places like India, Brazil, and China for a new approach to frugal and flexible innovation. The authors show how in these emerging markets, jugaad (a Hindi word meaning an improvised solution born from ingenuity and cleverness) is leading to dramatic growth and how Western companies can adopt jugaad innovation to succeed in our hypercompetitive world. Outlines the six principles of jugaad innovation: Seek opportunity in adversity, do more with less, think and act flexibly, keep it simple, include the margin, and follow your heart Features twenty case studies on large corporations from around the world—Google, Facebook, 3M, Apple, Best Buy, GE, IBM, Nokia, Procter & Gamble, PepsiCo, Tata Group, and more—that are actively practicing jugaad innovation The authors blog regularly at Harvard Business Review; their work has been profiled in BusinessWeek, MIT Sloan Management Review, The Financial Times, The Economist, and more Filled with previously untold and engaging stories of resourceful jugaad innovators and entrepreneurs in emerging markets and the United States This groundbreaking book shows leaders everywhere why the time is right for jugaad to emerge as a powerful business tool in the West—and how to bring jugaad practices to their organizations.

LEAN AND AGILE MANUFACTURING-S. R. DEVADASAN 2012-06-12 Contemporary fastidious companies are required to eliminate wastes and offer value-added products and services to the customers, which requirement is fulfilled by adopting the paradigm called 'lean manufacturing'. On the other side, futuristic companies surge towards reaching the twenty-first century mission by reacting quickly in accordance with the dynamic demands of the modern customers, for which researchers have been developing a paradigm called 'agile manufacturing'. Although various techniques and tools are applied, cohesive procedures are yet to be evolved to implement these paradigms systematically and successfully in companies. In this context, this book is evolved to address students, academics, practitioners and researchers for gaining theoretical, practical and research futuristic knowledge on lean and agile manufacturing paradigms. Organised in 18 chapters, the text opens with a historical overview of lean and agile manufacturing paradigms. It then discusses the lean manufacturing principles with their application procedures. The book comprehensively analyses the methods of implementation of lean manufacturing paradigm in both traditional and moderate organisations. It also gives an equal treatment to the implementation of agile manufacturing paradigm under four drivers such as management driver, technology driver, manufacturing strategy driver and competition driver through the adoption of appropriate agile manufacturing criteria. The book concludes with a discussion of lean and agile manufacturing paradigms from the perspectives of academia, researchers and practitioners. The text is well supported by a large number of self-test questions with their answers. A unique feature of the book is the inclusion of research avenues at the end of each chapter, which enable the readers to carry out researches on these paradigms. This book is intended for the undergraduate and postgraduate students of industrial, manufacturing, production and mechanical engineering.

Disease Control Priorities, Third Edition (Volume 2)-Robert Black 2016-04-11 The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

Gujarat-Bibek Debroy 2013-01-01 Drawing attention to Gujarat's template of governance, efficient public expenditure, decentralization, and participatory planning, this book relates the growth and development of this Indian state. Asserting that development is a result of the perceptible improvement in social sectors as well as of vibrant industry, it states the facts about the Gujarat model and explains how it has implications for other Indian states. Gujarat's macroeconomic growth was built through education, health, water, electricity, and roads, and this record reveals how these benefits have trickled down and how deprived segments have been main-streamed.

The Loss of Hindustan-Manan Ahmed Asif 2020-11-24 A field-changing history explains how the subcontinent lost its political identity as the home of all religions and emerged as India, the land of the Hindus. Did South Asia have a shared regional identity prior to the arrival of Europeans in the late fifteenth century? This is a subject of heated debate in scholarly circles and contemporary political discourse. Manan Ahmed Asif argues that Pakistan, Bangladesh, and the Republic of India share a common political ancestry: they are all part of a region whose people understand themselves as Hindustani. Asif describes the idea of Hindustan, as reflected in the work of native historians from roughly 1000 CE to 1900 CE, and how that idea went missing. This makes for a radical interpretation of how India came to its contemporary political identity. Asif argues that a European understanding of India as Hindu has replaced an earlier, native understanding of India as Hindustan, a home for all faiths. Turning to the subcontinent's medieval past, Asif uncovers a rich network of historians of Hindustan who imagined, studied, and shaped their kings, cities, and societies. Asif closely examines the most complete idea of Hindustan, elaborated by the early seventeenth century Deccan historian Firishta. His monumental work, Tarikh-i Firishta, became a major source for European philosophers and historians, such as Voltaire, Kant, Hegel, and Gibbon during the eighteenth and nineteenth centuries. Yet Firishta's notions of Hindustan were lost and replaced by a different idea of India that we inhabit today. The Loss of Hindustan reveals the intellectual pathways that dispensed with multicultural Hindustan and created a religiously partitioned world of today.
