Translations on Narcotics and Dangerous Drugs- 1977

Pihkal-Alexander Theodore Shulgín 1991 Phenethylamines I Have Known And Loved A unique document written by renowned psychopharmologist Shulgín and his partner which gives details of his research and investigations into the use of psychedelic drugs for the study of the human mind. Also describes in detail a wealth of phenethylamines, their physical properties, dosages used and duration of effects observed, and commentary.

Readings in American Health Care-William G. Rothstein 1995 Readings in American Health Care is an introduction to the historical development and current status of a wide variety of health care topics. The readings, written by historians, sociologists, economists, physicians, nurses, and public health researchers, are organized in sections: * Basic Concepts: mortality trends, concepts of disease, changes in medical therapy * Public Health: AIDS, cigarette smoking, preventive medicine, fluoridation * Health Care Professions: cardiology, pathology, women in medicine, nursing, podiatry, midwives * Health Care Organizations: hospitals, HMOs * Mental Illness * Financing Health Care * Medical Education * Issues: abortion, ethical issues, cancer control, prenatal care, home care, the pharmaceutical industry * Background Readings: American medicine from 1920 to midcentury. The readings were chosen especially for course use in history, sociology, public health, and related fields, but can also provide useful background reading for anyone interested or involved in American health care. Each selection includes an introduction, questions for the reader, and a bibliography. Scholars and students alike will find the book an invaluable resource.

Hippie Dictionary-John Basset Mcleary 2013-05-22 Whether you lived through the sixties and seventies or just wish you had, this revised and expanded edition of the Hippie Dictionary entertains as much as it educates. Cultural and political listings such as "Age of Aquarius," "Ceasar Chavez," and "Black Power Movement," plus popular phrases like "acid flashback," "get a grip," and "are you for real?" will remind you of how revolutionary those 20 years were. Although the hippie era spans two decades beginning with the approval of the birth control pill in 1960 and ending with the death of John Lennon in 1980, it wasn't all about sex, drugs, and rock'n' roll. These were the early years of pro-ecology and anti-capitalist beliefs-beliefs that are just as timely as ever. So kick back and trip out on the new entries as well as the old, and discover why some are dubbing the sixties and seventies "the intellectual renaissance of the 20th century."

The Anarchist Cookbook-William Powell 2018-03-11 The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There is detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

Devoted to Love-Shayla Black 2019 An all-new sizzling contemporary romance about an alpha bodyguard protecting his small-town Texas siren from lethal danger-from New York Times and USA Today bestselling author Shayla Black. Fundamentals of Human Neuropsychology-Bryan Kolb 2009-07 Written by respected academics in neuropsychology, this sixth edition guides students on a comprehensive journey of discovery through the realm of contemporary human neuropsychology. The book has a clinical focus throughout.

The Alice B. Toklas Cook Book-Alice B. Toklas 2021-04-13 A beautiful new edition of the classic culinary memoir by Alice B. Toklas, Gertrude Stein's romantic partner, with a new introduction by beloved culinary voice Ruth Reichl. Restaurant kitchens have long been dominated by men, but, as of late, there has been an explosion of interest in the many women chefs who are revolutionizing the culinary game. And, alongside that interest, an accompanying appetite for smart, well-crafted culinary memoirs by female trailblazers in food. Nearly 70 years earlier, there was Alice. When Alice B. Toklas was asked to write a memoir, she initially refused. Instead, she wrote The Alice B. Toklas Cook Book, a sharply written, deliciously rich cookbook memorializing meals and recipes shared by Hemingway, Fitzgerald, Wilder, Matisse, and Picasso--and of course by Alice and Gertrude themselves. While The Autobiography of Alice B. Toklas--penned by Gertrude Stein--adds vivid detail to Alice's life, this cookbook paints a richer, more joyous depiction: a celebration of a lifetime in pursuit of culinary delights. In this cookbook, Alice supplies recipes inspired by her travels, accompanied by amusing tales of her and Gertrude's lives together. In "Murder in the Kitchen," Alice describes the first carp she killed, after which she immediately lit up a cigarette and waited for the police to come and haul her away; in "Dishes for Artists," she describes her hunt for the perfect recipe to fit Picasso's peculiar diet; and, of course, in "Recipes for Friends," she provides the recipe for "Haschich Fudge," which she notes may often be accompanied by "ecstatic reveries and extensions of one's personality on several simultaneous planes." With an updated look and feel, and a heartwarming introduction from Gourmet's famed Editor-in-Chief Ruth Reichl, this much-loved, culinary classic is sure to resonate with food lovers and literary folk alike.

Methamphetamine and Amphetamines-David Aretha 2005 Describes the history, effects on the body, cost, and treatment of methamphetamine and amphetamine abuse, and includes stories of recovering addicts.

Grow Your Own Drugs-James Wong 2009 Whether you're struggling with insomnia, the kids have eczema, or your partner is feeling under the weather, this book could have the answer. With easy recipes ethnobotanist James Wong shows how to make simple creams, salves, teas and much much more from the stuff growing in your window box!

Dopesick-Beth Macy 2018-08-07 An instant New York Times bestseller, Dopesick is the only book to tell the full story of the opioid crisis, from the boardroom to the courtroom and into the living rooms of Americans struggling to save themselves and their families: "masterfully interlaces stories of communities in crisis with dark histories of corporate greed and regulatory indifference" (New York Times) from a journalist who has lived through it. In this extraordinary work, Beth Macy takes us into the epicenter of a national drama that has unfolded over two decades. From the labs and marketing departments of big pharma to local doctor's offices; wealthy suburbs to distressed small communities in Central Appalachia; from distant cities to once-idyllic farm towns; the spread of opioid addiction follows a tortuous trajectory that illustrates how this crisis has persisted for so long and become so firmly entrenched. Beginning with a single dealer who lands in a small Virginia town and sets about turning high school football stars into heroin overdose statistics, Macy sets out to answer a grieving mother's question-why her only son died-and comes away with a gripping, unputdownable story of greed and need. From the introduction of OxyContin in 1996, Macy investigates the powerful forces that led America's doctors and patients to embrace a medical culture where overtreatment with painkillers became the norm. In some of the same communities featured in her bestselling book Factory Man, the unemployed use painkillers both to numb the pain of joblessness and pay their bills, while privileged teens trade pills in cul-de-sacs, and even high school standouts fall prey to prostitution, jail, and death. Through unsparing, compelling, and unforgettably humane portraits of families and first responders determined to ameliorate this epidemic, each facet of the crisis comes into focus. In these politically fragmented times, Beth Macy shows that one thing uniting Americans across geographic, partisan, and class lines is opioid drug abuse. But even in the midst of twin crises in drug abuse and healthcare, Macy finds reason to hope and ample signs of the spirit and tenacity that are helping the countless ordinary people ensnared by addiction build a better future for themselves, their families, and their communities. "An impressive feat of journalism, monumental in scope and urgent in its implications." - Jennifer Latson, The Boston Globe

Sightlines- 1987

Practical LSD Manufacture-Uncle Fester 2007-02-01 This classic now in its third edition covers all the best methods used to make LSD. The emphasis is upon natural sources of lysergic acid such as wild ergot, morning glory seeds or woodrose seeds, but extraction of ergotamine migraine medicines are also detailed. Once the lysergic acid has been procured from these sources, the text moves on to detailed descriptions of the methods used to convert lysergic acid to LSD. The text does not stop there! It also gives detailed information on the chemicals used to make LSD in combination with lysergic acid, and what ordinary uses they have. The book also covers solvent management since extraction of lysergic acid from natural sources entails the use of a considerable amount of solvents. To further entertain the reader, a section is devoted to the production of TMA-2 from calamus oil, and MDMA or MDA from sassafras oil. A still further section is devoted to keeping out of trouble.

Autonomous-Annalee Newitz 2017-09-19 The highly anticipated science fiction debut from the founder of io9! Earth, 2144. Jack is an anti-patent scientist turned drug pirate, traversing the world in a submarine as a pharmaceutical Robin Hood, fabricating cheap scrips for poor people who can't otherwise afford them. But her latest drug hack has left a trail of lethal overdoses as people become addicted to their work, doing repetitive tasks until they become unsafe or insane. Hot on her trail, an unlikely pair: Elias, a brooding military agent, and his robotic partner, Paladin. As they race to stop information about the sinister origins of Jack's drug from getting out, they begin to form an uncommonly close bond that neither of them fully understand. And underlying it all is one fundamental question: Is freedom possible in a culture where everything, even people, can be owned?

Methland-Nick Reding 2010-06-03 Traces the efforts of a small Iowa community to counter the pervasiveness of crystal methamphetamine, in an account that offers insight into the drug's appeal while chronicling the author's numerous visits with the town's doctor, the local prosecutor and a long-time addict. Reprint. A best-selling book.

Inherent Vice-Thomas Pynchon 2012-06-13 A Best Book of the Year for the Chicago Tribune, Washington Post, San Francisco Chronicle, and Los Angeles Times Part noir, part psychedelic romp, all Thomas Pynchon—private eye Doc Sportello surfaces, occasionally, out of a marijuana haze to watch the end of an era. It's been awhile since Doc Sportello has seen his ex-girlfriend. Suddenly one day of nowhere she shows up with a story about a plot to kidnap a billionaire land developer whom she just happens to be in love with. It's the tail end of the psychedelic sixties in L.A., and Doc knows that "love" is another one of those words going around at the moment, like "trip" or "groovy," except this one usually leads to trouble. In this lively yarn, Thomas Pynchon, working in an unaccustomed genre, provides a classic illustration of the principle that if you can remember the sixties, you weren't there . . . or . . . if you were there, then you . . . or, wait, is it . . .

Drugs Unlimited-Mike Power 2014-10-14 The very first thing ever bought or sold on the Internet was marijuana, when Stanford and MIT students used ARPANET to cut a deal in the early '70s. Today, you can order any conceivable pill or powder with the click of a mouse. In Drugs Unlimited, Mike Power tells the tale of drugs in the Internet Age, in which users have outmaneuvered law enforcement, breached international borders, and created a massive worldwide black market. But the online market in narcotics isn't just changing the way drugs are bought and sold; it's changing the nature of drugs themselves. Enterprising dealers are using the Web to engage highly skilled foreign chemists to tweak the chemical structures of banned drugs—just enough to create a similar effect and just enough to render them legal in most parts of the world. Drugs are marketed as "not for human consumption," but everyone knows exactly how they're going to be used—what they can't know is whether their use might prove fatal. From dancefloors to the offices of apathetic government officials, via social networking sites and underground labs, Power explores this agile, international, virtual subculture that will always be one step ahead of the law.

HIV/AIDS in Europe-World Health Organization. Regional Office for Europe 2006 Tells the story of HIV/AIDS in Europe from a broad variety of perspectives: bio-medical, social, cultural, economic and political. The authors are leading experts from across the region and include both the infected and the affected, be they doctors or former drug users, United Nations employees or gay men, public health researchers or community activists. They describe how, from the first documented cases in 1981 to the present era of antiretroviral management, controlling the human immunodeficiency virus in Europe has provided elusive.

Psilocybin Mushroom Handbook-L. G. Nicholas 2006 First genuinely up-to-date guide to psychedelic mushroom cultivation in years, containing information on both indoor and outdoor varieties. Contains step-by-step photographs and illustrations with detailed directions for the cultivation of four different psilocybin species, a resource guide for supplies and an introduction to mushroom biology, plus essays on the use of psychoactive mushrooms in traditional and modern contexts and ethnobotanical advice exploring medicinal use and the plant-human relationship.

The Official High Times Cannabis Cookbook-Elise McDonough 2012-03-21 Presents recipes that feature cannabis as an ingredient, along with an introduction that covers topics such as the difference between hemp and cannabis, the plant's potency when eaten, different strains, and its fat content.

Saudi Arabia and Its Royal Family-William Powell 1982 Chronicles the House of Saud's rise to preeminence on the Arabian peninsula and unparalleled influence on world affairs and analyzes the role of Islam and the consequences of immense national wealth on contemporary Saudi Arabian society

A Brief History of Vice-Robert Evans 2016-08-09 "Mixing science, humor, and grossly irresponsible self-experimentation, Evans paints a vivid picture of how bad habits built the world we know and love." —David Wong, author of John Dies at the End History has never been more fun—or more intoxicating. Guns, germs, and steel might have transformed us from hunter-gatherers into modern man, but booze, sex, trash talk, and tripping built our civilization. Cracked editor Robert Evans brings his signature dogged research and lively insight to uncover the many and magnificent ways vice has influenced history, from the prostitute-turned-empress who scored a major victory for women's rights to the beer that helped create—and destroy—South America's first empire. And Evans goes deeper than simply writing about ancient debauchery; he recreates some of history's most enjoyable (and most painful) vices and includes guides so you can follow along at home. You'll learn how to: • Trip like a Greek philosopher. • Rave like your Stone Age ancestors. • Get drunk like a Sumerian. • Smoke a nose pipe like a pre-Columbian Native American. A celebration of the brave, drunken pioneers who built our civilization one seemingly bad decision at a time, A Brief History of Vice explores a side of the past that mainstream history books prefer to hide. From the Trade Paperback edition.

A Wine Miscellany-Graham Harding 2005 Packed with arcane information, trivia, and lore about everything from types of cork and other bottle closures to the rarest and the most expensive wines, a handbook for wine connoisseurs and novice oenophiles alike traces the history of wine from ancient times to the present day. 20,000 first printing.

Native American Anarchism-Eunice Minette Schuster 1932-01-01 From the far reaches of the human mind, come these tales of unrestrained, anti-authoritarianism. No government, no leaders, no authority, no rules, and complete freedom of action! Egoism, solipsism, anarchism, and other heresies -- now revealed to corrupt your mind!!! "Arguably the best book ever published on the history of Anarchism in the U.S". -- Left Bank Books "A gold mine... Anyone interested in the roots of free thought will be rewarded by reading it". -- Claustrophobia The history of anarchism in the United States from colonial times to the early 20th Century. Covers the abolitionists, women's rights movements; supporters of reproductive and sexual freedom; pacifist and anti-war movements; alternative communities and much more.

Smoke Signals-Martin A. Lee 2013-08-13 The best-selling co-author of Acid Dream traces the dramatic social history of marijuana from its origins and its emergence in the 1960s culture wars through the 1996 legalization of medicinal marijuana in California, profiling the multibillion-dollar marijuana industry and how it is reshaping health care. 35,000 first printing.

How to Change Your Mind-Michael Pollan 2019-05-14 New York Times Book Review 10 Best Books of 2018 A New York Times Notable Book The #1 New York Times bestseller. A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs—and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, How to Change Your Mind is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

Disease Control Priorities Related to Mental, Neurological, Developmental and Substance Abuse Disorders-World Health Organization. Department of Mental Health and Substance Abuse 2006 This publication brings together five chapters from Disease Control Priorities in Developing Countries 2nd edition (2006), along with an introduction and a conclusion by WHO. The chapters cover mental disorders, neurological disorders, learning and developmental disabilities, and alcohol and illicit opiate abuse. The purpose of this special package is to provide information on cost-effectiveness of interventions for these specific groups of disorders. This information should contribute to reformulation of policies and programs and reallocation of resources eventually leading to reduction of morbidity and mortality. The disorders and conditions covered in the five chapters of this volume are all characterized by low current levels of use of effective interventions. This underlines the need for substantial enhancement in resources but also presents an opportunity in that the cost-effectiveness data can be used to focus enhanced resources to those interventions that are shown to give the best value for money. As mental, neurological, developmental, and substance-use disorders move up in the public health agenda of developing countries, the evidence presented in this publication can assist in resource allocation.

The Psilocybin Mushroom Bible-Dr K. Mandrake 2016-10-11 The Psilocybin Mushroom Bible details every step of the complex mushroom cultivation process, making it hands down the largest and most comprehensive book ever written on the subject. Readers will learn how to produce their own magic mushrooms quickly, safely, and effectively. The book features over 40 step-by-step photographic instruction guides to each step of the process, including: sterilizing the equipment to produce mushrooms; how to build the containers used during home mushroom cultivation; safety measures for preventing contamination of the mushroom cultures; and a guide to consuming magic mushrooms safely and enjoyably. Dr. Mandrake uses his doctoral studies in mycology to detail the history and botany of psilocybin mushrooms to give readers an idea of their prevalence throughout human history. The book is highly detailed and comprehensive, allowing readers to learn the entire process required to produce perfect magic mushrooms every time.

Forthcoming Books-Rose Army 2003

Global Problems-Scott Sernau 2006 "Global Problems: The Search for Equity, Peace, and Sustainability" examines the various dimensions of globalization and the social problems of inequality, war and violence, and environmental sustainability that are occurring on a global scale. Clear writing and vivid, current examples help readers to better understand their roles as global citizens. The book is divided into three parts: Part I focuses on the challenges of global inequalities: in life chances, wages and work, gender and education. Part II focuses on conflict and violence at all levels: from crime to politics, terrorism to war. Part III focuses on the issue of sustainability and the problems of urbanization, crowding, and environmental destruction.

A Dictionary of Applied Chemistry-Edward Thorpe 1912

Outside Looking In-T.C. Boyle 2019-04-09 A provocative new novel from bestselling author T.C. Boyle exploring the first scientific and recreational forays into LSD and its mind-altering possibilities In this stirring and insightful novel, T.C. Boyle takes us back to the 1960s and to the early days of a drug whose effects have reverberated widely throughout our culture: LSD. In 1943, LSD is synthesized in Basel. Two decades later, a coterie of grad students at Harvard are gradually drawn into the inner circle of renowned psychologist and psychedelic drug enthusiast Timothy Leary. Fitzhugh Loney, a psychology Ph.D. student and his wife, Joanie, become entranced by the drug's possibilities such that their "research" becomes less a matter of clinical trials and academic papers and instead turns into a free-wheeling exploration of mind expansion, group dynamics, and communal living. With his trademark humor and pathos, Boyle moves us through the Loneys' initiation at one of Leary's parties to his notorious summer seminars in Zihuatanejo until the Loneys' eventual expulsion from Harvard and their introduction to a communal arrangement of thirty devotees—students, wives, and children—living together in a sixty-four room mansion and devoting themselves to all kinds of experimentation and questioning. Is LSD a belief system? Does it allow you to see God? Can the Loneys' marriage—or any marriage, for that matter—survive the chaotic and sometimes orgiastic use of psychedelic drugs? Wry, witty, and wise, Outside Looking In is an ideal subject for this American master, and highlights Boyle's acrobatic prose, detailed plots, and big ideas. It's an utterly engaging and occasionally trippy look at the nature of reality, identity, and consciousness, as well as our seemingly infinite capacities for creativity, re-invention, and self-discovery.

Poisoning & Drug Overdose-Kent Russell Olson 2004 The best manual on the diagnosis and treatment of poisoning and drug overdose. Thoroughly updated, this reference features extensive tables summarizing toxicity and workplace exposure guidelines for over 500 industrial chemicals, an index containing the ingredients of over 150 common commercial products, and tabs for quick reference.

Absolute Addiction Psychiatry Review-Carla Marienfeld 2020-03-06 This book serves as a tool for general psychiatrists, medical students, residents, and fellows looking for a clinically relevant and high-yield overview of addiction psychiatry in preparation for their board exams - or for everyday clinical practice. Written by expert educators in addiction psychiatry, the text is organized by substances misused and populations affected. This book serves as both a primary learning tool for those new to the field, as well as a reference for those working in addiction treatment. Each chapter begins with summaries of high yield clinical pearls, followed by general information including treatment, and then ends with accompanying board-style review questions. The scope includes understanding substances of misuse and substance use disorders (SUDs), how to evaluate, diagnose, and monitor SUDs, how to treat SUDs both pharmacologically and behaviorally, and critical information for specific populations of patients. Absolute Addiction Psychiatry for Clinical Practice and Review is an excellent resource for all medical students, residents, fellows, and professionals taking certification exams in addiction, including those in psychiatry, addiction medicine, emergency medicine, internal medicine, pain medicine, and others. The chapter "Laboratory Testing for Substance Use Disorders" is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Sex, Drugs, Gambling and Chocolate-A. Thomas Horvath 2003-08-01 There is an alternative to 12-step. Eliminate or reduce any type of addictive behavior with this practical and effective workbook. -- on back cover.

Psychedelic Shamanism-Jim DeKorne 2011 "Psychedelic Shamanism presents a useful guide to the cultivation of psychedelic plants and their use as catalysts for exploring the structure of human consciousness and imaginal realms of reality as described by Eastern and Western spiritual traditions, modern depth psychology, and indigenous cultures throughout the world"--Provided by publisher.

The Center Cannot Hold-Elyn R. Saks 2007-08-14 A much-praised memoir of living and surviving mental illness as well as "a stereotype-shattering look at a tenacious woman whose brain is her best friend and her worst enemy" (Time). Elyn R. Saks is an esteemed professor, lawyer, and psychiatrist and is the Orrin B. Evans Professor of Law, Psychology, Psychiatry, and the Behavioral Sciences at the University of Southern California Law School, yet she has suffered from schizophrenia for most of her life, and still has ongoing major episodes of the illness. The Center Cannot Hold is the eloquent, moving story of Elyn's life, from the first time that she heard voices speaking to her as a young teenager, to attempted suicides in college, through learning to live on her own as an adult in an often terrifying world. Saks discusses frankly the paranoia, the inability to tell imaginary fears from real ones, the voices in her head telling her to kill herself (and to harm others), as well as the incredibly difficult obstacles she overcame to become a highly respected professional. This beautifully written memoir is destined to become a classic in its genre.

Marihuana-E.L. Abel 2013-06-29 Of all the plants men have ever grown, none has been praised and denounced as often as marihuana (Cannabis sativa). Throughout the ages, marihuana has been extolled as one of man's greatest benefactors and cursed as one of his greatest scourges. Marihuana is undoubtedly a herb that has been many things to many people. Armies and navies have used it to make war, men and women to make love. Hunters and fishermen have snared the most ferocious creatures, from the tiger to the shark, in its herculean weave. Fashion designers have dressed the most elegant women in its supple knit. Hangmen have snapped the necks of thieves and murderers with its fiber. Obstetricians have eased the pain of childbirth with its leaves. Farmers have crushed its seeds and used the oil within to light their lamps. Mourners have thrown its seeds into blazing fires and have had their sorrow transformed into blissful ecstasy by the fumes that filled the air. Marihuana has been known by many names: hemp, hashish, dagga, bhang, loco weed, grass-the list is endless. Formally christened Cannabis sativa in 1753 by Carl Linnaeus, marihuana is one of nature's hardiest specimens. It needs little care to thrive. One need not talk to it, sing to it, or play soothing tranquil Brahms lullabies to coax it to grow. It is as vigorous as a weed. It is ubiquitous. It flourishes under nearly every possible climatic condition.
