Talent Wins-Ram Charan 2018-03-06 Radical Advice for Reinventing Talent—and HR Most executives today recognize the competitive advantage of human capital, and yet the talent practices their organizations use are stuck in the twentieth century. Typical talent-planning and HR processes are designed for predictable environments, traditional ways of getting work done, and organizations where "lines and boxes" still define how people are managed. As work and organizations have become more fluid—and business strategy is no longer about planning years ahead but about sensing and seizing new opportunities and adapting to a constantly changing environment—companies must deploy talent in new ways to remain competitive. Turning conventional views on their heads, talent and leadership experts Ram Charan, Dominic Barton, and Dennis Carey provide leaders with a new and different playbook for acquiring, managing, and deploying talent—for today's agile, digital, analytical, technologically driven strategic environment—and for creating the HR function that business needs. Filled with examples of forward-thinking companies that have adopted radical new approaches to talent (such as ADP, Amgen, BlackRock, Blackstone, Haier, ING, Marsh, Tata Communications, Telenor, and Volvo), as well as the juggernauts and the startups of Silicon Valley, this book shows leaders how to bring the rigor that they apply to financial capital to their human capital—elevating HR to the same level as finance in their organizations. Providing deep, expert insight and advice for what needs to change and how to change it, this is the definitive book for reimagining and creating a talent-driven organization that wins.

This set of practices goes well beyond the usual managerial coaching and performance management. It moves the focus from performance today to development of skills that truly "raise the game" of employees—skills such as in-the-moment judgment, customer relationship building and collaborative decision-making. Grit-Angela Duckworth 2016-05-03 In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls "grit." "Inspiration for non-geniuses everywhere" (People). The daughter of a scientist who frequently noted her lack of "genius," Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In Grit, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. "Duckworth's ideas about the cultivation of tenacity have clearly changed some lives for the better" (The New York Times Book Review). Among Grit's most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, Grit is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is "a fascinating tour of the psychological research on success" (The Wall Street Journal).

Recruitconsult! Leadership: The Corporate Talent Acquisition Leader's Field Book-Jeremy M. Eskenazi 2011-12 When it came to attracting and managing new talent, the recruiting and staffing team within a corporation's human resources department was once regarded as transactional, administrative, and not as effective as third party staffing companies because it was usually a fairly new introduction, and the staff often consisted of junior-level personnel. Over the last 15-20 years though, thanks to the professionalization of the "corporate talent acquisition" function, there have been dramatic changes in the way top employees are found through the use of technology, tools, sophisticated recruiting techniques, and the Internet media. Unfortunately, however, the leader's role within this function has failed to evolve at the same speed, which is why Jeremy Eskenazi wrote RecruitCONSULT! Leadership-The Corporate Talent Acquisition Leader's Field Book, to help improve and optimize the way corporate talent acquisition professionals lead. In this frank, realistic, and forward-thinking field guide, readers will learn: Corporate Staffing leadership does not happen in a vacuum and relationships are key; regardless of budget, resources, or industry, there are always effective Corporate Staffing strategy solutions available; Corporate Staffing/Talent Acquisition leadership is an active process that must be focused; leading and managing Corporate Staffing is a distinct profession. Today, the position of recruiting leader has become significantly more complicated due to company globalization, and rather than administrators, corporations now look to employ true talent acquisition strategists who can drive competitive value for their organization and "win" through quality employees. While laying out strategic workforce plans for future development of staffing strategies, Eskenazi's unique business approach introduces the benefits of transitioning to this new-age form of recruiting, and he hopes his readers will be relieved to discover that what could be very stressful has been diffused, broken down into solutions, and presented with humor. RecruitCONSULT! Leadership-- The Corporate Talent Acquisition Leader's Field Book, is the definitive guidebook for anyone who is leading (or wants to lead) a corporate recruiting and staffing function. Corporate recruiting and staffing expert, Jeremy Eskenazi, details many of the issues, concepts, and solutions to challenges a corporate recruiting and staffing leader may face including: Workforce Planning, Metrics & Economics, Building a Consultative Staffing Team, Leading a Proactive Staffing Function, Organizational Politics, The Power of Relationships, Change Management, and the Globalization of Recruiting. The 48 Laws of Power-Robert Greene 2000-09-01 Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control - from the author of The Laws of Human Nature. In the book that People magazine proclaimed "beguiling" and "fascinating," Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence ("Law 1: Never Outshine the Master"), others teach the value of confidence ("Law 28: Enter Action with Boldness"), and many recommend absolute self-preservation ("Law 15: Crush Your Enemy Totally"). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, The 48 Laws of Power is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

The Talent Code-Daniel Coyle 2009-04-28 What is the secret of talent? How do we unlock it? This groundbreaking work provides readers with tools they can use to maximize potential in themselves and others. Whether you're coaching soccer or teaching a child to play the piano, writing a novel or trying to improve your golf swing, this revolutionary book shows you how to grow talent by tapping into a newly discovered brain mechanism. Drawing on cutting-edge neurology and firsthand research gathered on journeys to nine of the world's talent hotbeds—from the baseball fields of the Caribbean to a classical-music academy in upstate New York—Coyle identifies the three key elements that will allow you to develop your gifts and optimize your performance in sports, art, music, math, or just about anything. • Deep Practice Everyone knows that practice is a key to success. What everyone doesn't know is that specific kinds of practice can increase skill up to ten times faster than conventional practice. • Ignition We all need a little motivation to get started. But what separates truly high achievers from the rest of the pack? A higher level of commitment—call it passion—born out of our deepest unconscious desires and triggered by certain primal cues. Understanding how these signals work can help you ignite passion and catalyze skill development. • Master Coaching What are the secrets of the world's most effective teachers, trainers, and coaches? Discover the four virtues that enable these "talent whisperers" to fuel passion, inspire deep practice, and bring out the best in their students. These three elements work together within your brain to form myelin, a microscopic neural substance that adds vast amounts of speed and accuracy to your movements and thoughts. Scientists have discovered that myelin might just be the holy grail: the foundation of all forms of greatness, from Michelangelo's to Michael Jordan's. The good news about myelin is that it isn't fixed at birth; to the contrary, it grows, and like anything that grows, it can be cultivated and nourished. Combining revelatory analysis with illuminating examples of regular people who have achieved greatness, this book will not only change the way you think about talent, but equip you to reach your own highest potential.
