Rethinking Islamic Studies-Carl W. Ernst 2012-11-27 Rethinking Islamic Studies upends scholarly roadblocks in post-Orientalist discourse within contemporary Islamic studies and carves fresh inroads toward a robust new understanding of the discipline, one that includes religious studies and other politically infused fields of inquiry. Editors Carl W. Ernst and Richard C. Martin, along with a distinguished group of scholars, map the trajectory of the study of Islam and offer innovative approaches to the theoretical and methodological frameworks that have traditionally dominated the field. In the volume's first section the contributors reexamine the underlying notions of modernity in the East and West and allow for the possibility of multiple and incongruent modernities. This opens a discussion of fundamentalism as a manifestation of the tensions of modernity in Muslim cultures. The second section addresses the volatile character of Islamic religious identity as expressed in religious and political movements at national and local levels. In the third section, contributors focus on Muslim communities in Asia and examine the formation of religious models and concepts as they appear in this region. This study concludes with an afterword by accomplished Islamic studies scholar Bruce B. Lawrence reflecting on the evolution of this post-Orientalist approach to Islam and placing the volume within existing and emerging scholarship. Rethinking Islamic Studies offers original perspectives for the discipline, each utilizing the tools of modern academic inquiry, to help illuminate contemporary incarnations of Islam for a growing audience of those invested in a sharper understanding of the Muslim world.

Quiz Book on Islam for All Levels of Expertise-Husain A. Nuri 2007-02-01

Religious Literacy-Stephen Prothero 2009-10-13 The United States is one of the most religious places on earth, but it is also a nation of shocking religious illiteracy. Only 10 percent of American teenagers can name all five major world religions and 15 percent cannot name any. Nearly two-thirds of Americans believe that the Bible holds the answers to all or most of life's basic questions, yet only half of American adults can name even one of the four gospels and most Americans cannot name the first book of the Bible. Despite this lack of basic knowledge, politicians and pundits continue to root public policy arguments in religious rhetoric whose meanings are missed—or misinterpreted—by the vast majority of Americans. "We have a major civic problem on our hands," says religion scholar Stephen Prothero. He makes the provocative case that to remedy this problem, we should return to teaching religion in the public schools. Alongside "reading, writing, and arithmetic," religion ought to become the "Fourth R" of American education. Many believe that America's descent into religious illiteracy was the doing of activist judges and secularists hell-bent on banishing religion from the public square. Prothero reveals that this is a profound misunderstanding. "In one of the great ironies of American religious history," Prothero writes, "it was the nation's most fervent people of faith who steered us down the road to religious illiteracy. Just how that happened is one of the stories this book has to tell." Prothero avoids the trap of religious relativism by addressing both the core tenets of the world's major religions and the real differences among them. Complete with a dictionary of the key beliefs, characters, and stories of Christianity, Islam, and other religions, Religious Literacy reveals what every American needs to know in order to confront the domestic and foreign challenges facing this country today.

A History of Islamic Law-N. Coulson 2017-07-12 Lawyers, according to Edmund Burke, are bad historians. He was referring to an unwillingness, rather than an inaptitude, on the part of early nineteenth-century English lawyers to concern themselves with the past: for contemporary jurisprudence was a pure and isolated science wherein law appeared as a body of rules, based upon objective criteria, whose nature and very existence were independent of considerations of time and place. Despite the influence of the historical school of Western jurisprudence, Burke's observation is generally valid for Middle East studies. Muslim jurisprudence in its traditional form provides an extreme example of a legal science divorced from historical considerations. Law, in classical Islamic theory, is the revealed will of God, a divinely ordained system preceding, and not preceded by, the Muslim state controlling, but not controlled by, Muslim society. There can thus be no relativistic notion of the law itself evolving as an historical phenomenon closely tied with the progress of society. The increasing number of nations that are largely Muslim or have a Muslim head

of state, emphasizes the growing political importance of the Islamic world, and, as a result, the desirability of extending and expanding the understanding and appreciation of their culture and belief systems. Since history counts for much among Muslims and what happened in 632 or 656 is still a live issue, a journalistic familiarity with present conditions is not enough; there must also be some awareness of how the past has molded the present. This book is designed to give the reader a clear picture. But where there are gaps, obscurities, and differences of opinion, these are also indicated.

Bridging the Divide Between Immigrant and African American Muslims by Utilizing the Concept of Tawheed as the Catalyst-Dr. Salahuddin Mustafa Muhammad 2011-04-21 The Islamic community boasts of being one united community. Its cornerstone belief is Tawheed (Oneness of G-d). Its fundamental principle is the Unity of G-d, and this speaks to the unity of humanity. Yet when you look at the Islamic community over its almost fifteen century history; racism, prejudice, bias, and discrimination have continued to prevail. I argue that the Islamic community has suffered fragmentation, as a result of this artificial divide. Therefore, the one united community has been more of an ideal than reality. I contend that really understanding the concept of Tawheed is the true answer--the bridge--as it were--to overcoming this artificial divide, the divide that separates the immigrant Muslim from the African American Muslim.

Observing the Observer-Zahid Bukhari 2012 THE collection of papers in this volume documents the study of Islam in American Universities. Over the last few decades the United States has seen significant growth in the study of Islam and Islamic societies in institutions of higher learning fueled primarily by events including economic relations of the U.S. with Muslim countries, migration of Muslims into the country, conversion of Americans to Islam, U.S. interests in Arab oil resources, involvement of Muslims in the American public square, and the tragic events of 9/11. Although there is increasing recognition that the study of Islam and the role of Muslims is strategically essential in a climate of global integration, multiculturalism, and political turmoil, nevertheless, the state of Islamic Studies in America is far from satisfactory. The issue needs to be addressed, particularly as the need for intelligent debate and understanding is continuously stifled by what some have termed an "Islam industry" run primarily by fly-by journalists, think tank pundits, and cut-and-paste "experts."

Contemporary Bioethics-Mohammed Ali Al-Bar 2015-05-27 This book discusses the common principles of morality and ethics derived from divinely endowed intuitive reason through the creation of al-fitr' a (nature) and human intellect (al-'aql). Biomedical topics are presented and ethical issues related to topics such as genetic testing, assisted reproduction and organ transplantation are discussed. Whereas these natural sources are God's special gifts to human beings, God's revelation as given to the prophets is the supernatural source of divine guidance through which human communities have been guided at all times through history. The second part of the book concentrates on the objectives of Islamic religious practice - the maqa' sid - which include: Preservation of Faith, Preservation of Life, Preservation of Mind (intellect and reason), Preservation of Progeny (al-nasl) and Preservation of Property. Lastly, the third part of the book discusses selected topical issues, including abortion, assisted reproduction devices, genetics, organ transplantation, brain death and end-of-life aspects. For each topic, the current medical evidence is followed by a detailed discussion of the ethical issues involved.

The Essentials of Islam-Saeed Bin Ahmed Al-Lootah 2003-01-01 God declares in the Quran, The only religion in the sight of Allah is Islam, and that if anyone desires a religion other than Islam, it will not be accepted from him: Therefore, seeking knowledge about Islam is the inviolable, sacrosanct duty of all human beings. It is binding upon all to familiarize themselves with the tenets of Islam, which Allah declares in His infallible Book, the Quran, to be the religion which he has chosen for mankind. Ignorance about its indubitable words of wisdom and human salvation does not give anyone the license to deny this religion of Allah. Indeed, such ignorance an inexcusable moral condition. This book presents the foremost principles of Islam in a very comprehensible, reader-friendly, lucid, and concise manner. The purpose of the book is to provide its readers with full details about articles of faith, the pillars of Islam and general rules encompassing all prohibitions pertaining to food and drink, clothes, professions, matters of family relations, etc. in a very clear and conclusive manner, which is in consonance with the teachings of the Quran. Islam represents Divine religion, which is free from ambiguity and dissonance. This book aims at building faith in precisely this manner. It is a work par excellence, which teaches in the simplest and most pellucid fashion the tenets which are the building blocks of Islam. The ineffable beauty of this book is the brevity of its language and the precision of its teachings.

Striving in the Path of God-Asma Afsaruddin 2013-05-07 In popular and academic literature, jihad is predominantly assumed to refer exclusively to armed combat, and martyrdom in the Islamic context is understood to be invariably of the military kind. This perspective, derived mainly from legal texts, has led to discussions of jihad and martyrdom as concepts with fixed, universal meanings divorced from the socio-political circumstances in which they have been deployed through the centuries. Asma Afsaruddin studies in a more holistic manner the range of significations that can be ascribed to the term jihad from the earliest period to the present and historically contextualizes the competing discourses that developed over time. Many assumptions about the military jihad and martyrdom in Islam are thereby challenged and deconstructed. A comprehensive interrogation of varied sources reveals early and multiple competing definitions of a word that in combination with the phrase fi sabil Allah translates literally to "striving in the path of God." Contemporary radical Islamists have appropriated this language to exhort their cadres to armed political opposition, which they legitimize under the rubric of jihad. Afsaruddin shows that the multivalent connotations of jihad and shahid recovered from the formative period lead us to question the assertions of those who maintain that belligerent and militant interpretations preserve the earliest and only authentic understanding of these two key terms. Retrieval of these multiple perspectives has important implications for our world today in which the concepts of jihad and martyrdom are still being fiercely debated.

Crisis in the Muslim Mind-AbdulHamid AbuSulayman 2004-01-01 Across the Muslim world today, if anything is self-evident across the Muslim world today it is that the Ummah is badly in need of reform. On this point it can be stated with confidence that Muslims are agreed. Poverty and injustice characterize the face of Muslim lands from the Atlantic to the Pacific. Pollution and corruption are the order of the day in the societies where the gulf between them and the developed countries of the world has never been wider. Politics in the Muslim world are all too often the politics of deprivation, and culture the culture of despair. "Crisis in the Muslim Mind" examines the intellectual and historical roots of the malaise that has encompassed the Ummah and threatens to efface its identity. First published in Arabic in 1991, this important work (in an abridged English translation) is designed to familiarize educated and concerned Muslims with the nature of the crisis confronting them, and to suggest the steps necessary to overcome it.
