Pegi by Herself-Laura Brandon 2005-02-03 One of the most vibrant artists of her generation, Pegi Nicol MacLeod was a charismatic bohemian whose expressive images of the contemporary world were an essential component of Canadian modernism during the 1930s and 1940s. In Pegi by Herself, the first full-length biography of Nicol MacLeod, Laura Brandon draws on the artist's remarkable autobiographical paintings and extraordinarily vivid letters. Remembered as much for her colourful life, love affairs, and significant friendships with Vincent Massey, Norman Bethune, Frank Scott, and Graham Spry as for her artistic achievement, Nicol MacLeod exhibited successfully and received significant commissions from the National Gallery of Canada to paint the wartime women's services and was honoured there with a memorial exhibition following her early death in 1949. Lavishly illustrated, Pegi by Herself accompanies Pegi Nicol MacLeod: A Life in Art, a touring retrospective exhibition of the artist's work that opens at the Carleton University Art Gallery in February 2005 and the premiere of an NFB film biography.

Daylighters-Rachel Caine 2013-11-05 While Morganville, Texas, is often a troubled town, Claire Danvers and her friends are looking forward to coming home. But the Morganville they return to isn't the one they know; it's become a different place—a deadly one... Something drastic has happened in Morganville while Claire and her friends were away. The town looks cleaner and happier than they've ever seen it before, but when their incoming group is arrested and separated—vampires from humans—they realize that the changes definitely aren't for the better. It seems that an organization called the Daylight Foundation has offered the population of Morganville something they've never had: hope of a vampire-free future. And while it sounds like salvation—even for the vampires themselves—the truth is far more sinister and deadly. Now, Claire, Shane and Eve need to find a way to break their friends out of Daylighter custody, before the vampires of Morganville meet their untimely end... Includes a teaser from Prince of Shadows: A Novel of Romeo and Juliet!

Math on Trial-Leila Schneps 2013-03-12 In the wrong hands, math can be deadly. Even the simplest numbers can become powerful forces when manipulated by journalists, politicians or other public figures, but in the case of the law your liberty—and your life—can depend on the right calculation. Math on Trial tells the story of ten trials in which mathematical arguments were used—and disastrously misused—as evidence. Despite years of math classes, most people (and most jurors) fail to detect even simple mathematical sophistry, resulting in such horrors as a medical expert's faulty calculation of probabilities providing the key evidence for a British mother's conviction for the murder of her two babies. The conviction was later overturned, but three years in prison took its toll—Sally Clark died of acute alcohol intoxication in March of 2007. Mathematicians Leila Schneps and Coralie Colmez use a wide range of examples, from a mid-19th-century dispute over wills that became a signal case in the forensic use of mathematics, to the conviction and subsequent exoneration of Amanda Knox, to show how the improper application of mathematical concepts can mean the difference between walking free and life in prison. The cases discussed include: -The Case of Amanda Knox (How a judge's denial of a second DNA test may have destroyed a chance to reveal the truth about Meredith Kercher's murder) -The Case of Joe Sneed (How a fabricated probability framed a son for his parents' grisly killing) -The Case of Sally Clark (How multiplying non-independent probabilities landed an innocent mother in jail for the murder of her children) -The Case of Janet Collins (How unjustified estimates combined with a miscalculated probability convicted an innocent couple of violent robbery) A colorful narrative of mathematical abuse featuring such characters as Charles Ponzi, Alfred Dreyfus, Hetty Green, and Oliver Wendell Holmes, Math on Trial shows that legal expertise isn't everything when it comes to proving a man innocent.

Years later, Eva is no longer the same wistful girl but a hardened woman who no longer believes in dreams. Losing faith in her gift, she becomes lost in a nightmare of emotion, mourning her son, separating from her husband, and stewing in a dead-end job. And then fate brings her an unlikely surprise: one of the most famous movie stars in the world, Gabriel Roberts.
