Toyota Celica GT-Four-Graham Robson 2015-04-21 This is a comprehensive study of the career of the Toyota Celica GT-Four. Starting in 1988, three generations of this effective turbocharged four-wheel-drive car - known by enthusiasts as ST165, ST185 and ST205 types - fought for World Championships, and were amazingly successful for almost a decade. All types combined high-performance, great reliability, and superb preparation by Toyota Team Europe (based in Cologne, Germany), their 300bhp/four-wheel-drive chassis package being among the best in the world. Over the years, the cars won some of the roughest events in the world (such as the Safari and the Acropolis), and were also supreme on tarmac, snow and ice, including Monte Carlo. After fighting a running battle with Lancia for years, the Celicas won the World Manufacturers' Championship twice. Its famous drivers included Carlos Sainz (World Champion in 1990 and 1992), Juha Kankkunen (Champion in 1993) and Didier Auriol (Champion in 1994). Never far from controversy, and at times embroiled in technical and regulatory disputes, these cars brought real glamour to the colourful sport of rallying, and were only replaced by an even higher-tech Toyota - the Corolla World Rally Car - in 1997.

highly competitive marketplace with Ford's always popular F150. At the same time, other truck builders such as Dodge, International Harvester, and Jeep were constantly applying pressure to increase sales in an attempt to capture more market share at the expense of the leaders. Following a brief history of Chevrolet's building of the corporation's half-ton pickup trucks, the book takes an extensive look at Chevrolet's half-ton C/K-Series pickup trucks with emphasis on the all new model, followed by a year-by-year description of the evolving 1970s models, and the various market demands, which often led to the introduction of niche models to broaden its market base. As well, Chevrolet reacted to a changing marketplace which included a greater interest in 4WD, while being detoured by fuel shortages, ever-changing fuel economy and pollution regulations, and the constant quest to reduce overall weight. In addition to the production models, there are chapters on the restoration and the growing interest in the customizing of these Chevy C/K models by enthusiasts.

The Great British Rally-Graham Robson 2021-02-16 Now in paperback, The Great British Rally is the complete history of British international rally events, starting with the very first RAC rally of 1932, which included 1,000 miles of road motoring, when a mere three driving tests were needed to produce a result. By 1951 an international permit had been achieved, a speed element was included, and the 'Rally of the Tests' ran until 1960. From 1961, the event took on a number of high-speed, loose-surfaced Special Stages, the Scandinavian influence became clear, and the event took on a World Championship qualification in 1973. In that time, competing cars had progressed from having perhaps 50bhp to at least 300bhp, and even more high-tech machines with 500bhp and four-wheel-drive would follow. By then the RAC Rally was - and remains in its present form as Wales Rally GB - one of the three most important rallies in the world. Every 'works' team makes sure that it is represented, and it has a very important image throughout the world. Major sponsors embraced the event from the 1960s - first The Sun and Daily Mirror, then Lombard, and Network Q, and finally the Welsh government - which in recent years has become a very high-profile showcase for the world's most exciting cars. Few other British International events have such a long and distinguished record. The 75th running of this event takes place in 2019. With year-by-year accounts of all events in the Rally's history, copiously illustrated with period photographs, and covering the various challenges posed by such crises as foot and mouth disease, weather conditions and controversy over rules and regulations, this book is the definitive guide.

The Invention of the Automobile - (Karl Benz and Gottlieb Daimler)-St. John C. Nixon 2016-02-15 " ... My excuse for writing this book is a desire to ventilate certain facts in relation to the early work of Karl Benz and Gottlieb Daimler of which the public is largely ignorant. Among those who have taken the trouble to investigate the early days of the motor movement, there is a certain amount of controversy as to who invented the motor vehicle, although this question has not, at the moment, extended to the general public. Inevitably it will do so, if the prevailing interest increases, in which event, it is hoped that this book will prove useful, for all the dates and facts, etc., have been fully authenticated. There are, however, several to whom I must express my sincere gratitude for the assistance they have given me. Herr Rudolf Caracciola, the winner, during the 1935 season of motor racing, of the Grand Prix of France, Belgium, Switzerland, Spain, and Tripoli, to say nothing of other triumphs, and therefore the Champion of Europe, has most kindly written a preface after reading through the manuscript. The Daimler-Benz Aktiengesellschaft of Germany has been indefatigable in providing me with material in regard to certain facts connected with the early experiments of both Benz and Daimler. Mr. Frederick R. Simms, too, has spared no effort to help me with some of the inner details of Daimler's engineering career." ( ST. John C. Nixon - September, 1936)
