The Circus Of Ghosts-Barbara Ewing 2011-07-28 New York, late 1840s, and in the wild, noisy, brash and beautiful circus of Silas P. Swift a shadowy, mesmeric woman entrances crowds because she can unlock the secrets of troubled minds. Above them all her daughter sweeps and soars: acrobat and tightrope-walker. People cannot take their eyes from the mysterious woman in the Big Top who can help so many others - but she cannot unlock dark, literally unspeakable, memories of her own. In London memories fester in the mind of an old and venomous duke of the realm. He plots, with an unscrupulous lawyer (and a huge financial reward) against the mother and the daughter: to kill one, and to abduct the other and bring her across the Atlantic to him: She is mine. The actress and mesmerist Cordelia Preston and her daughter Gwenlliam live with their unusual family in the exciting new city among exciting new ideas: the telegraph, the daguerrotype, anaesthesia, table-tapping. And among the dangerous street-gangs of New York also, whose raw violence meets Cordelia and Gwenlliam and those that they love, with unexpected results.

There are also notes at the end of each chapter designed to aid readers that have difficulty with the workshops. Alice's Adventures in Wonderland (Collins Classics)-Lewis Carroll 2010-06-03 HarperCollins is proud to present a range of best-loved, essential classics.

Alice's Adventures in Wonderland-Lewis Carroll 2015-09-29 Commemorating the 150th anniversary of one of the most beloved classics of children's literature, this illustrated edition presents Alice like you've never seen her before. In 1865, Charles Lutwidge Dodgson, an Oxford mathematician and Anglican deacon, published a story about a little girl who tumbles down a rabbit hole. Thus was the world first introduced to Alice and her pseudonymous creator, Lewis Carroll. This beautiful new edition of Alice's Adventures in Wonderland features rarely seen illustrations by Salvador Dalí that illuminate the surreal yet curiously logical and mathematical realm into which Alice famously falls. In an informative and wide-ranging introduction, Carroll expert Mark Burstein discusses Dalí's connections with Carroll, his treatment of the symbolic figure of Alice, and the mathematical nature of Wonderland. In addition, mathematician Thomas Banchoff reflects on the friendship he shared with Dalí and explores the mathematical undercurrents in Dalí's work.

Principal Writings on Religion-David Hume 1998 David Hume is one of the most provocative philosophers to have written in English. His Dialogues ask if a belief in God can be inferred from what is known of the universe, or whether such a belief is even consistent with such knowledge. The Natural History of Religion investigates the origins of belief, and follows its development from polytheism to dogmatic monotheism. Together, these works constitute the most formidable attack upon religious belief ever mounted by a philosopher. This new edition includes Section XI of The Enquiry Concerning Human Understanding and a letter by Hume in which he discusses Dialogues.

Manned Spaceflight Log II—2006–2012-David J. Shayler 2013-04-05 “Manned Spaceflight Log” discusses over 40 recent spaceflights from September 2006 through September 2012, a time of great change in human spaceflight history. Following on from “Praxis Manned Spaceflight Log 1961-2006,” the authors continue the story until the end of September 2012, with new chapters detailing the development and accomplishments of human spaceflight, expanded tables and additional photographs, many in color, throughout. The book opens with a new foreword by Colonel Alfred M. Worden, USAF Retired, NASA Astronaut and CMP of Apollo 15, which reflects on the changing history of human spaceflight and the prospects for future operations. The first chapter explains how human spaceflight has approached the different challenges of exploring space and provided the hardware to meet those challenges. This chapter also describes the various attempts to reach orbital flight and the often confusing distinction between ballistic, sub-orbital, and so-called ‘astro-flights’ of the X-15 rocket research aircraft program. Chapter 2 recalls key historic moments and missions across five decades of human spaceflight. Each decade has provided useful lessons for the next and a foundation for future achievement. The new mission entries are collected in the third section in chronological order. A review of the next steps in human spaceflight, including plans to occupy the International Space Station well into the 2020s and the growth of the Chinese manned space program including a large space station and planned base on the Moon, is discussed in Chapter 4. The tables provide a complete up-to-date overview of human spaceflight operations and experience from April 1961 to September 2012 and a selected chronology of important milestones from those years. Completing the book is a comprehensive bibliography that lists all the major Springer-Praxis human spaceflight titles and other important works that provide the reader with a resource to continue further research.

Dreaming in Hindi-Katherine Russell Rich 2010-06-10 An eye-opening and courageous memoir that explores what learning a new language can teach us about distant worlds and, ultimately, ourselves. After miraculously surviving a serious illness, Katherine Rich found herself at an impasse in her career as a magazine editor. She spontaneously accepted a freelance writing assignment to go to India, where she found herself thunderstruck by the place and the language, and before she knew it she was on her way to Udaipur, a city in the northwestern state of Rajasthan, in order to learn Hindi. Rich documents her experiences—ranging from the bizarre to the frightening to the unexpectedly exhilarating—using Hindi as the lens through which she is given a new perspective not only on India, but on the radical way the country and the language itself were changing her. Fascinated by the process, she went on to interview linguistics experts around the world, reporting back from the frontlines of the science wars on what happens in the brain when we learn a new language. She brings both of these experiences together seamlessly in Dreaming in Hindi, a remarkably unique and thoughtful account of self-discovery.
