Operational Amplifiers and Linear Integrated Circuits-Robert F. Coughlin 1982 This popular book presents a clear and interesting approach for op-amp courses while examining four basic active filters, illustrating 5-V digital logic ICs, and more. It provides many detailed, practical design and analysis examples intended to relate theory to the workplace. Chapter topics include first experiences with an op amp; inverting and noninverting amplifiers; comparators and controls; selected applications of op amps; signal generators; op amps with diodes; differential, instrumentation, and bridge amplifiers; DC performance: bias, offsets, and drift; AC performance: bandwidth, slew rate, noise; active filters; modulating, demodulating, and frequency changing with the multiplier; integrated-circuit timers; digital-to-analog converters; analog-to-digital converters; and power supplies. For design engineers rs

Plant Ecology-Ernst-Detlef Schulze 2005-02-18 This textbook covers Plant Ecology from the molecular to the global level. It covers the following areas in unprecedented breadth and depth: - Molecular ecophysiology (stress physiology; light, temperature, oxygen deficiency, drought, salt, heavy metals, xenobiotica and biotic stress factors) - Autecology (whole plant ecology: thermal balance, water, nutrient, carbon relations) - Ecosystem ecology (plants as part of ecosystems, element cycles, biodiversity) - Synecology (development of vegetation in time and space, interactions between vegetation and the abiotic and biotic environment) - Global aspects of plant ecology (global change, global biogeochemical cycles, land use, international conventions, socio-economic interactions) The book is carefully structured and well written: complex issues are elegantly presented and easily understandable. It contains more than 500 photographs and drawings, mostly in colour, illustrating the fascinating subject. The book is primarily aimed at graduate students of biology but will also be of interest to post-graduate students and researchers in botany, geosciences and landscape ecology. Further, it provides a sound basis for those dealing with agriculture, forestry, land use, and landscape management.

14th International Conference on Soft Computing Models in Industrial and Environmental Applications (SOCO 2019)-Francisco Martinez Álvarez 2019-04-30 This book includes 57 papers presented at the SOCO 2019 conference held in the historic city of Seville (Spain), in May 2019. Soft computing represents a set of computational techniques in machine learning, computer science and various engineering disciplines, which investigate, simulate, and analyze very complex issues and phenomena. The selection of papers was extremely rigorous in order to maintain the high quality of the conference, which featured a number of special sessions, including sessions on: Soft Computing Methods in Manufacturing and Management Systems; Soft Computing Applications in the Field of Industrial and Management Enterprises; Optimization, Modeling and Control by Soft Computing Techniques; and Soft Computing in Aerospace, Mechanical and Civil Engineering: New methods and Industrial Applications.

Custom and Confrontation-Roger M. Keesing 1992-12 "Anthropologists and students of anthropology may read this book because it is a superior ethnography, detailed and enriched by theoretical insights. But at the heart of this book is a moral take, a simple but powerful story about an indigenous people who were wronged, who resisted for more than 100 years, and who may yet prevail. This message, ultimately, lends the book its true meaning and value."—William Rodman, Anthropologica "A major contribution to the ethnography and history of Malaita and Melanesia, and to the growing literature on cultural resistance. But above all, his humane and painful analysis of the meeting of peoples living in different worlds and constructing their agendas and moralities on incommensurate—and apparently equally arbitrary—principles, represents a major contribution and challenge to anthropological thought, addressing the basic issue of what it is to be human."—Fredrik Barth
