Overcoming Stagnation in Aid-dependent Countries-Nicolas Van de Walle 2005 In this book, Nicolas Van de Walle identifies 26 countries that are extremely poor and grew little if at all in the 1990s. His sample excludes North Korea and countries where civil war explains some of their failure to grow (Afghanistan, Sierra Leone, Sudan, Tajikistan and others). The 26 countries have limited infrastructure and human capital and the small size of their markets deter private savings and investment. Aid was meant to help overcome these problems, and these countries received a lot. Yet they have failed to grow. What is wrong? Is foreign aid a solution or part of the problem? What changes might make aid more effective? Given these countries require the financial and technical resources of the West, why haven't aid programs made a difference? Van de Walle blames their economic failure mostly on the venality and incompetence of their political leadership. He analyzes the contradictions and tensions faced by the aid community in poorly run countries, providing a sobering analysis of the perverse effects of aid where the politics is all wrong. Too often, resources provided by foreign aid keep the wrong government in office, and undermine adoption of economic as well as political reforms. Bad government combined with aid, in short, hurts poor countries - and particularly the poorest people in those countries. Despite good intentions, little progress has been made in implementing announced "reforms" of the aid business itself. A constituency for reform is lacking, in the donor countries and in the recipient countries, where those in power benefit from the status quo.

Coventry Climax Racing Engines-Des Hammill In the 50s & 60s Coventry Climax engines powered many race-winning cars, including some driven by Stirling Moss & Jack Brabham. To get the true inside story, the author, an engineer, has talked to all surviving Coventry Climax personnel who were involved with the racing engines. The author was given full access to all of Walter Hassan's papers, photographs and engine drawings. After 30 months of original research and writing, this book describes exactly how these famous engines developed from industrial fire pumps to the Hillman Imp, from Le Mans winning Lotus Elites to Formula One winners driven by Stirling Moss and Jack Brabham, right through to the company's takeover by Jaguar in 1963. Viewed through the eyes of an engineer, and the detailed recollections of those who were there, this is a fascinating account of the trials and tribulations of leading edge race engine design from 1952 to 1966.

Lessons from the Teachers for a New Era Project-G Williamson McDiarmid 2017-07-06 Chronicling a high-profile and ambitious teacher preparation reform project that took place across 11 diverse U.S. institutions, this volume examines the strategies, program changes, accomplishments, and challenges from the Teachers for a New Era Project (TNE). TNE aimed to improve the preparation of K-12 teachers and address mounting criticisms of university-based teacher education. Funded primarily by the Carnegie Corporation of New York, TNE targeted the most persistent problems in university-based teacher preparation programs, focused on evidence-based assessment of program impact, and developed strategies for improvement. Exploring both the successes and tensions that arose from the program, this book contributes to future teacher education and program assessment endeavors, and offers lessons that can inform current policies and practices.

Bacteriophage Ecology-Stephen T. Abedon 2008-05-01 Bacteriophages, or phages, are viruses that infect bacteria and are believed to be the most abundant and genetically diverse organisms on Earth. As such, their ecology is vast both in quantitative and qualitative terms. Their abundance makes an understanding of phage ecology increasingly relevant to bacterial ecosystem ecology, bacterial genomics and bacterial pathology. Abedon provides the first text on phage ecology for almost 20 years. Written by leading experts, synthesizing the three key approaches to studying phage ecology, namely studying them in natural environments (in situ), experimentally in the lab, or theoretically using mathematical or computer models. With strong emphasis on microbial population biology and distilling cutting-edge research into basic principles, this book will complement other currently available volumes. It will therefore serve as an essential resource for graduate students and researchers, particularly those with an interest in phage ecology and evolutionary biology.

An Historian in Peace and War-T.G. Otte 2016-04-15 The First World War and subsequent peace settlement shaped the course of the twentieth century, and the profound significance of these events were not lost on Harold Temperley, whose diaries are presented here. An established scholar, and later one of Britain's foremost modern and diplomatic historians, Temperley enlisted in the army at the outbreak of the war in August 1914. Invalided home from the Dardanelles campaign in 1915, he spent the remainder of the war and its aftermath as a general staff officer in military intelligence. Here he played a significant role in preparing British strategy for the eventual peace conference and in finalising several post-war boundaries in Eastern Europe. Later, in the 1920s and 1930s, Temperley was to co-edit the British diplomatic documents on the origins of the war; and the vicissitudes of modern Great Power politics were to be his principal preoccupation. Beginning in June 1916, the diary presents a more or less daily record of Temperley's activities and observations throughout the war and subsequent peace negotiations. As a professional historian he appreciated the significance of eyewitness accounts, and if Temperley was not at the very heart of Allied decision-making during those years, he certainly had a ringside seat. Trained to observe accurately, he recorded the concerns and confusions of wartime, conscious always of the historical significance of what he observed. As a result there are few sources that match Temperley's diary, which presents a fascinating and unique perspective upon the politics and diplomacy of the First World War and its aftermath.

Emotional Freedom Technique & Acupressure, Color Breathing, Visualization-Clark Night 2010-03-17 Black and White version. EFT is an Easy Type of Chinese Acupressure, Puncture without Needles or Hard Pressure. EFT is applied by 'TAPPING', activating energy points, meridians on/in the body with the fingertips. Tapping removes energy blocks, (stuck, stagnant energy), orients, 'polarizes', corrects, balances and strengthens the energy flow in the body, through the Meridians/Energy Pathways, Energy Points, Chakras, Nervous System. (Electric, Chi and other Energies, Physical and Spiritual.) Tai Chi, Qi Gong, Karate Energy Control Methods are related to EFT. EFT removes negative, destructive emotions, thoughts, feelings, stress from the mind/brain, system by correcting energy flow. The body's energies flow correct and strengthen. EFT balances and improves function of the left and right brain hemispheres. This produces good health, clear eyesight. Neck, chest, shoulder, eye muscle tension, stiff, infrequent eye 'shifting' movements, headaches, strain in the mind/brain, negative, unhappy past/present thoughts, emotions, experiences, blocked energy flow, lowered liver/kidney health, staring, squinting cause unclear eyesight. Negative, destructive thoughts, emotions, worry are a common cause of mental strain, back, chest, shoulder, neck, eye muscle tension and unclear eyesight. Lowered eyesight increases worry, mental strain, which then increases the body..., neck, eye muscle tension. Eye function is impaired. Light rays focus incorrect in the eye. Circulation to/in the eye lowers. Vision is more unclear. EFT, Nutrition, Natural Eyesight Improvement corrects these conditions; Blocked energy (experienced during a stressful event) happens first, before the negative emotions occur and locks them into the mind/body. Negative thoughts, emotions maintain blocked energy flow. Removing blocked energy first results in removal of the negative emotions, thoughts, feelings and often brings instant clear eyesight. As EFT Tapping removes energy blocks, corrects the energy flow, resulting in removal of negative emotions, thoughts, feelings; the person can then place positive, constructive thoughts into the mind, system; think, feel in a positive, constructive way about the past or present stressful event. Positive thoughts, emotions help to correct and strengthen the body's energy flow. Correct energy flow is now maintained. Mental and physical health improve, eye function returns to normal, eyesight is 20/20 and clearer at all distances, close and far. Health of body organs, systems improve as energy flows correct throughout the body. EFT improves the function of the brain, visual cortex, left and right brain hemisphere activation, integration. This improves function of the brain with the eyes, retina, eye muscles and body. Eyesight and mental, physical health improve. Memory, imagination, math, science, speech, learning, creativity, art, music..., skills - all functions of the brain, left and right hemispheres even the oldest, deep survival areas of the brain improve. This is a main treatment of Natural Eyesight Improvement.
