Teaching Music Appreciation Online-Bethanie L. Hansen 2019-10-08 In this book, readers will learn practical tips and strategies to teach music appreciation online. As online education is a growing field, an increasing number of teachers trained in traditional/live methods find themselves now teaching online and potentially without mentors to assist them. Students are also changing, seeking highly engaged, relevant, and interactive learning opportunities that connect to their lives. Here, readers will find helpful guidance in planning curriculum, integrating multimedia assets, designing forum discussions, developing assignments, preparing rubrics, engaging in forum discussions, preparing, managing, and teaching, the course, providing feedback and grading, and following up with struggling and challenging students. Additionally, it may serve as a resource to instructors in other disciplines who seek to shift live-courses to the online format, as well as music appreciation instructors who would like to integrate digital or online components into traditional face-to-face courses. The book is organized into five major sections, designed to guide the novice online educator in depth while also appealing to the seasoned veteran through the ability to review each section as a stand-alone resource. Although some readers will desire to read from cover to cover, they will also be able to move in a non-linear manner from chapter to chapter, using chapters in modular form, in order to benefit from the sections that most apply to them at any given time.

Listening-Jean-Luc Nancy 2009-08-25 In this lyrical meditation on listening, Jean-Luc Nancy examines sound in relation to the human body. How is listening different from hearing? What does listening entail? How does what is heard differ from what is seen? Can philosophy even address listening, écouter, as opposed to entendre, which means both hearing and understanding? Unlike the visual arts, sound produces effects that persist long after it has stopped. The body, Nancy says, is itself like an echo chamber, responding to music by inner vibrations as well as outer attentiveness. Since "the ear has no eyelid" (Quignard), sound cannot be blocked out or ignored: our whole being is involved in listening, just as it is involved in interpreting what it hears. The mystery of music and of its effects on the listener is subtly examined. Nancy's skill as a philosopher is to bring the reader companionably along with him as he examines these fresh and vital questions: by the end of the book the reader feels as if listening very carefully to a person talking quietly, close to the ear.

The Rest Is Noise-Alex Ross 2007-10-16 The scandal over modern music has not died down. While paintings by Pablo Picasso and Jackson Pollock sell for a hundred million dollars or more, shocking musical works from Stravinsky's Rite of Spring onward still send ripples of unease through audiences. At the same time, the influence of modern music can be felt everywhere. Avant-garde sounds populate the soundtracks of Hollywood thrillers. Minimalist music has had a huge effect on rock, pop, and dance music from the Velvet Underground onward. Alex Ross, the brilliant music critic for The New Yorker, shines a bright light on this secret world, and shows how it has pervaded every corner of twentieth century life. The Rest Is Noise takes the reader inside the labyrinth of modern sound. It tells of maverick personalities who have resisted the cult of the classical past, struggled against the indifference of a wide public, and defied the will of dictators. Whether they have charmed audiences with the purest beauty or battered them with the purest noise, composers have always been exuberantly of the present, defying the stereotype of classical music as a dying art. Ross, in this sweeping and dramatic narrative, takes us from Vienna before the First World War to Paris in the twenties, from Hitler's Germany and Stalin's Russia to downtown New York in the sixties and seventies. We follow the rise of mass culture and mass politics, of dramatic new technologies, of hot and cold wars, of experiments, revolutions, riots, and friendships forged and broken. In the tradition of Simon Schama's The Embarrassment of Riches and Louis Menand's The Metaphysical Club, the end result is not so much a history of twentieth-century music as a history of the twentieth century through its music.

The First Four Notes-Matthew Guerrieri 2014 "A TIME Magazine Top 10 Nonfiction Book of 2012 New YorkerBest Book of the Year 1>Los Angeles Magazine's #1 Music Book of the Year /b>-unique and revelatory book of music history that examines in great depth what is perhaps the best-known and most-popular symphony ever written and its four-note opening, which has fascinated musicians, historians, and philosophers for the last two hundred years. Music critic Matthew Guerrieri reaches back before Beethoven's time to examine what might have influenced him in writing his Fifth Symphony, and forward into our own time to describe the ways in which the Fifth has, in turn, asserted its influence. He uncovers possible sources for the famous opening notes in the rhythms of ancient Greek poetry and certain French Revolutionary songs and symphonies. Guerrieri confirms that, contrary to popular belief, Beethoven was not deaf when he wrote the Fifth. He traces the Fifth's influence in China, Russia, and the United States (Emerson and Thoreau were passionate fans) and shows how the masterpiece was used by both the Allies and the Nazis in World War II. Altogether, a fascinating piece of musical detective work a tr

The Hidden Brain-Shankar Vedantam 2010-01-19 The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

Unfreedom of the Press-Mark R. Levin 2020-08-11 Six-time New York Times bestselling author, FOX News star, and radio host Mark R. Levin "trounces the news media" (The Washington Times) in this timely and groundbreaking book demonstrating how the great tradition of American free press has degenerated into a standardless profession that has squandered the faith and trust of the public. Unfreedom of the Press is not just another book about the press. In "Levin's finest work" (Breitbart), he shows how those entrusted with news reporting today are destroying freedom of the press from within—not through actions of government officials, but with its own abandonment of republican integrity and objective journalism. With the depth of historical background for which his books are renowned, Levin takes you on a journey through the early American patriot press, which proudly promoted the principles set forth in the Declaration of Independence and the Constitution. This is followed by the early decades of the Republic during which newspapers around the young country were open and transparent about their fierce allegiance to one political party or another. It was only at the start of the Progressive Era and the 20th century that the supposed "objectivity of the press" first surfaced, leaving us where we are today: with a partisan party-press overwhelmingly aligned with a political ideology but hypocritically engaged in a massive untruth as to its real nature.
