Two years of Excel shortcuts and five hundred of HBS's notorious business case studies lay ahead of him, but he couldn't have told you what OCRA was, other than a vegetable, or whether discount department stores make more money than airlines. He did, however, know that HBS's alumni appeared to be taking over the world. The US president, the president of the World Bank, the US treasury secretary, the CEOs of General Electric, Goldman Sachs and Proctor & Gamble - all were bringing HBS experience to the way they ran their banks, businesses and even countries. And with the prospect of economic enlightenment before him, he decided to see for himself exactly what they teach you at Harvard Business School. Philip Delves Broughton's hilarious and enlightening account of his experiences within Harvard Business School's hallowed walls provides an extraordinary glimpse into a world of case study conundrums, guest lectures, Apprentice-style tasks, booze lugging, burn-outs and high flyers. And with HBS alumni heading the very global governments, financial institutions and FTSE 500 companies whose reckless love of deregulation and debt got us into so much trouble, he discovers where HBS really adds value - and where it falls disturbingly short.</p> <p>What They Don't Teach You at Harvard Business School-Mark H. Do they help society by making better business leaders? No, they don't, Steven Conn asserts, and what's more they never have. In throwing down a gauntlet on the business of business schools, Conn's Nothing Succeeds Like Failure examines the frictions, conflicts, and contradictions at the heart of these enterprises and details the way business schools have failed to resolve them. Beginning with founding of the Wharton School in 1881, Conn measures these schools' aspirations against their actual accomplishments and tells the full and disappointing history of missed opportunities, unmet aspirations, and educational mistakes. Conn then poses a set of crucial questions about the role and function of American business schools. The results aren't pretty. Posing a set of crucial questions about the function of American business schools, Nothing Succeeds Like Failure is pugnacious and controversial. Deeply researched and fun to read, Nothing Succeeds Like Failure argues that the impressive façades of business school buildings resemble nothing so much as collegiate versions of Oz. Conn pulls back the curtain to reveal a story of failure to meet the expectations of the public, their missions, their graduates, and their own lofty aspirations of producing moral and ethical business leaders.</p> <p>Business School Confidential-Katherine F. Based on extensive field research in several leading US business schools, this groundbreaking ethnography exposes what the culture of MBA training says about contemporary understandings of capitalism in the context of globalization. Orta details the rituals of MBA life and the ways MBA curricula cultivate both habits of fast-paced technical competence and “softer” qualities and talents thought to be essential to unlocking the value of international cultural difference while managing its risks. The Golden Passport-Duff McDonald 2017-04-25 With The Firm, financial journalist Duff McDonald pulled back the curtain on consulting giant McKinsey & Company. In The Golden Passport, he reveals the inner works of a singular nexus of power, ambition, and influence: Harvard Business School. Harvard University still occupies a unique place in the public’s imagination, but the Harvard Business School eclipsed its parent in terms of influence on modern society long ago. A Harvard degree guarantees respect. But a Harvard MBA near-guarantees entrance into Western capitalism’s most powerful realm—the corner office. And because the School shapes the way its powerful graduates think, its influence extends well beyond their own lives. It affects the organizations they command, the economy they dominate, and society itself. Decisions and priorities at HBS touch every single one of us. Most people have a vague knowledge of the power of the HBS network, but few understand the dynamics that have made HBS an indestructible and dominant force for almost a century. Graduates of HBS share more than just an alma mater. They also share a way of thinking about how the world should work, and they have successfully molded the world to that vision—that is what truly binds them together. In addition to teasing out the essence of this exclusive, if not necessarily “secret” club, McDonald explores two important questions: Has the school failed at reaching the goal it set for itself—“the multiplication of men who will handle their current business problems in socially constructive ways?” Is HBS complicit in the moral failings of Western capitalism? At a time of soaring economic inequality and growing political unrest, this hard-hitting yet fair portrait offers a much-needed look at an institution that has had a profound influence not just in the world of business but on the shape of our society—and on all our lives.

The Business of the 21st Century-Robert T. Kiyosaki 2019-10-22 In The Business of the 21st Century, Robert Kiyosaki explains the revolutionary business of network marketing in the context of what makes any business a success in any economic situation. This book lends credibility to multilevel marketing business, and justifies why it is an ideal avenue through which to learn basic business and sales skills... and earn money.

Shut Down the Business School-Martin Parker 2018 Business schools are institutions which, a decade after the financial crash, continue to act as loudspeakers for neoliberal capitalism with all its injustices and planetary consequences. In this lively and incendiary call to action, Martin Parker offers a simple message: shut down the business school.Parker argues that business schools are 'cash cows' for the contemporary university that have produced a generation of unreflective managers, primarily interested in their own personal rewards. If we see universities as institutions with responsibilities to the societies they inhabit, then we must challenge the common notion that 'the market' should be the primary determinant of the education they provide.Shut Down the Business School makes a compelling case for a radical alternative, in the form of a 'School for Organising'. This institution would develop and teach on different forms of organising, instead of reproducing the dominant corporate model, enabling individuals to discover alternative responses to the pressing issues of inequality and sustainability faced by all of us today.

Teaching and Learning at Business Schools-Dr Kristina Nilsson 2012-10-01 Business schools are facing ever increasing internationalization: students are far less homogenous than before, faculty members come from different countries, and teaching is carried out in second (or even third) languages. As a result business schools and their teachers wrestle with new challenges as these changes accelerate. Teaching and Learning at Business Schools brings together contributions from business school managers and educators involved in the International Teachers Programme; a faculty development programme started by Harvard Business School more than 30 years ago and now run by a consortium of the London Business School, Manchester Business School, Kellogg, Stern School of Business, INSEAD, HEC Paris, IAE Aix-en-Provence, IMD, SDA Bocconi Milan and Stockholm School of Economics. The book tackles themes both within the classroom - teaching across different contexts and cultures - and outside the classroom - leading and developing business schools, designing and running programmes, developing faculty members. The authors provide direction, ideas and techniques for transforming business education that are accessible to everyone.

The Founder’s Dilemmas-Noam Wasserman 2013-04-01 Often downplayed in the excitement of starting up a new business venture is one of the most important decisions entrepreneurs will face: should they go it alone, or bring in cofounders, hires, and investors to help build the business? More than just financial rewards are at stake. Friendships and relationships can suffer. Bad decisions at the inception of a promising venture lay the foundations for its eventual ruin. The Founder's Dilemmas is the first book to examine the early decisions by entrepreneurs that can make or break a startup and its team. Drawing on a decade of research, Noam Wasserman reveals the common pitfalls founders face and how to avoid them. He looks at whether it is a good idea to cofound with friends or relatives, how and when to split the equity within the founding team, and how to recognize when a successful founder-CEO should exit or be fired. Wasserman explains how to anticipate, avoid, or recover from disastrous mistakes that can splinter a founding team, strip founders of control, and leave founders without a financial payoff for their hard work and innovative ideas. He highlights the need at each step to strike a careful balance between controlling the startup and attracting the best resources to grow it, and demonstrates why the easy short-term choice is often the most perilous in the long term. The Founder’s Dilemmas draws on the inside stories of founders like Evan Williams of Twitter and Tim Westergren of Pandora, while mining quantitative data on almost ten thousand founders. People problems are the leading cause of failure in startups. This book offers solutions.
