Managing and Leading People Through Organizational Change-Dr Julie Hodges 2016-02-03 Tremendous forces for change are radically reshaping the world of work. Disruptive innovations, radical thinking, new business models and resource scarcity are impacting every sector. Although the scale of expected change is not unprecedented, what is unique is the pervasive nature of the change and its accelerating pace which people in organizations have to cope with. Structures, systems, processes and strategies are relatively simple to understand and even fix. People, however, are more complex. Change can have a different impact on each of them, all of which can cause different attitudes and reactions. Managing and Leading People Through Organizational Change is written for leaders with the key responsibility of managing people through transitions. Managing and Leading People through Organizational Change provides a critical analysis of change and transformation in organizations from a theoretical and practical perspective. It addresses the individual, team and organizational issues of leading and managing people before, during and after change, using case studies and interviews with people from organizations in different sectors across the globe. This book demonstrates how theory can be applied in practice through practical examples and recommendations, focusing on the importance of understanding the impact of the nature of change on individuals and engaging them collaboratively throughout the transformation journey.

The Successful Virtual Classroom-Darlene Christopher 2014-10-09 Virtual training gives learning professionals unprecedented flexibility, making it possible to reach participants globally and unite physically dispersed teams. But designers and facilitators must adapt their programs and delivery styles in order to be effective in this new medium. The Successful Virtual Classroom goes beyond introducing the technology, to offer trainers proven techniques tailored specifically to engage live online audiences. Packed with easy-to-use tools, checklists, and worksheets—as well as case studies from Oracle, UPS, and more—the book introduces the PREP model for planning, rehearsing, executing, and then conducting a post mortem following the training event. Readers will learn how to: Make the most of virtual classroom features such as content and screen sharing, annotation tools, polls, and breakout rooms • Weave chat

responses into the discussion • Compensate for the absence of body language • Monitor feedback • Engage individuals with different learning styles • Encourage audience contribution • Meet the unique needs of global participants • And more Featuring icebreakers and interactive exercises designed for an online environment, this book helps readers create programs that truly drive learner engagement.

Mobile Learning-John Traxler 2015-11-06 Mobile Learning: The Next Generation documents the most innovative projects in context-aware mobile learning in order to develop a richer theoretical understanding of learning in modern mobile-connected societies. Context-aware mobile learning takes advantage of cell phone, mobile, and pervasive personal technologies to design learning experiences that exploit the richness of both indoor and outdoor environments. These technologies detect a learner's presence in a particular place, the learner's history in that place or in relation to other people and objects nearby, and adapt learning experiences accordingly, enabling and encouraging learners to use personal and social technologies to capture aspects of the environment as learning resources, and to share their reactions to them.

Management Intelligent Systems-Jorge Casillas 2013-11-18 This symposium was born as a research forum to present and discuss original, rigorous and significant contributions on Artificial Intelligence-based (AI) solutions—with a strong, practical logic and, preferably, with empirical applications—developed to aid the management of organizations in multiple areas, activities, processes and problem-solving; what we call Management Intelligent Systems (MiS). This volume presents the proceedings of these activities in a collection of contributions with many original approaches. They address diverse Management and Business areas of application such as decision support, segmentation of markets, CRM, product design, service personalization, organizational design, e-commerce, credit scoring, workplace integration, innovation management, business database analysis, workflow management, location of stores, etc. A wide variety of AI techniques have been applied to these areas such as multi-objective optimization and evolutionary algorithms, classification algorithms, ant algorithms, fuzzy rule-based systems, intelligent

agents, Web mining, neural networks, Bayesian models, data warehousing, rough sets, etc. This volume also includes a track focused on the latest research on Intelligent Systems and Technology Enhanced Learning (iTEL), as well as its impacts for learners and institutions. It aims at bringing together researchers and developers from both the professional and the academic realms to present, discuss and debate the latest advances on intelligent systems and technology-enhanced learning. The symposium was organized by the Soft Computing and Intelligent Information Systems Research Group (<http://sci2s.ugr.es>) of the University of Granada (Spain) and the Bioinformatics, Intelligent System and Educational Technology Research Group ([http:// bisite.usal.es/](http://bisite.usal.es/)) of the University of Salamanca (Spain). The present edition was held in Salamanca (Spain) on May 22-24, 2013.

Teaching with Zoom-Keith Folse 2020-06-04 Teaching with Zoom is a book written by a teacher for teachers. Using non-technical, everyday language and my 'teacher thinking,' I explain how to accomplish typical classroom activities - including checking attendance, working in groups, presenting new material using interactive polls, writing on a shared whiteboard, and more. I also cover security and privacy issues, troubleshooting common problems, and getting additional help. This guide truly starts at the very beginning, so even a teacher who has never used Zoom before can learn how to successfully set up and manage a class. The practical information in this book is presented through 46 common teacher questions (How do I show a PowerPoint? How do students ask a question? Can I use Zoom for office hours?) with detailed answers that walk you through each step, supported with over 50 screenshots. For each activity, I explain not only how to accomplish it with Zoom but why you might want to do that task a certain way. Online teaching involves not only teachers but also students and parents, and all three voices should be considered for better online instruction. To this end, I've included a chapter filled with dozens of insightful comments from students, parents, and teachers who have used Zoom.
