Time and the Moment in Victorian Literature and Society-Sue Zemka 2011-11-24 Sudden changes, opportunities, or revelations have always carried a special significance in Western culture, from the Greek and later the Christian kairos to Evangelical experiences of conversion. This fascinating book explores the ways in which England, under the influence of industrializing forces and increased precision in assessing the passing of time, attached importance to moments, events that compress great significance into small units of time. Sue Zemka questions the importance that modernity invests in momentary events, from religion to aesthetics and philosophy. She argues for a strain in Victorian and early modern novels critical of the values the age invested in moments of time, and suggests that such novels also offer a correction to contemporary culture and criticism, with its emphasis on the momentary event as an agency of change.

Race Tech's Motorcycle Suspension Bible-Paul Thede 2010-06-19 Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Dictionary of Civil Engineering-Jean-Paul Kurtz 2004-09-14 I am pleased to present a work which marks a milestone in the history of public works and, more precisely, in that of permanent structures—a comprehensive dictionary of Civil Engineering terms. Since the beginning of time, Man has always tried to find a means to clear the obstacles which nature erected to displace him. With the first tree trunk thrown across a river, man sought to improve the crossing structure. After the invention of the wheel, and to satisfy his thirst for conquest (Roman ways), and comfort (aqueducts), man built bridges that became a preremptory necessity to move quickly. Thus, Man started to build wooden and masonry works. With the passing centuries, the builders became masters in the art of building masonry works. Then came the Industrial Revolution and the advent of the steel (1864), which was closely followed by the invention of the reinforced concrete (1855). The need for railways and improving the road network inspired great works of crossing such as viaducts and tunnels. The boom of the railway network and the development of the car required the construction of an increasing number of new structures. This phenomenon continues today with hundreds of structures built each year throughout the world.

Poems (Illustrated)-Wilfred Owen 2020-03-21 Wilfred Owen's book of wartime poetry is full of strong imagery and brutal honesty of the first world war. Owen was killed in action in November, 1918 - and was posthumously promoted to lieutenant the day after his death. His words, however, live on. Owen's close friend Siegfried Sassoon collected as many of Owen's poetry as he could - some finished, others incomplete, and published them in a poetry book so that others could read his insightful poetry.
